Choose an ear cushion size, extra small (XXS) to large (L), which best fits your ears. Selecting the correct ear cushion size helps ensure a comfortable fit and seal to achieve optimal sound quality.

Attach ear cushions to earphone nozzle. Push ear cushion past rib on nozzle so ear cushion will not separate from nozzle during use.

Insert the earphone cable connector into the 3.5 mm headphone jack on your iPod or MP3 player.

Gently insert earphone into your ear for a good seal: **R** for right ear; **L** for left. Never remove an earphone from your ear by pulling on its cable.

## Compatibility

- The remote and mic are supported only by iPod nano (4th generation and later), iPod classic (120GB, 160GB only), iPod touch (2nd generation and later), iPhone 3GS, iPhone 4, and iPad. The remote is supported by iPod shuffle (3rd generation and later). Audio is supported by all iPod models. Requires latest iPod software.
- Also compatible with BlackBerry® with 3.5 mm jack. Volume control functionality not available with BlackBerry devices. Audio is supported by most music-enabled smartphones with a 3.5 mm jack.

## Troubleshooting

- No sound/weak sound—ensure that the 3.5 mm headset connector is fully seated into the headphone jack on your iPod, MP3 player, cell phone, laptop, or gaming device. Check the volume setting in your media application. For laptops running Windows® or Mac® OS, make the headset the default audio device. (See operating system documentation for more information.)
- Weak bass—check ear cushion seal; try another ear cushion size.
- Detached ear cushions—firmly attach ear cushions to earphone nozzle. See step 2 on reverse side.
- Diminished sound quality—remove ear cushions, check for blockage in nozzle, and wipe with a clean cloth.
- Missing ear cushions—go to [www.logitech.com](http://www.logitech.com) for replacements.
