

THE TIME TO START USING IN-EAR MONITORS IS NOW

Custom in-ear monitors are for all musicians who take playing shows seriously. IEMs are tools of the trade that help improve performance. Waiting for the next tour is too late. Fans that see your live shows now are the ones who pay the price.

Getting custom IEMs may seem like a luxury and we understand that price is always a factor. So here is our promise and commitment to any band that wants to make the switch:

- 1) We will help make sure that you and your artists are getting the [right IEMs for your needs](#) and that your purchases match your budget and your goals.
- 2) We will answer all your questions and provide honest feedback. By the time you're done talking with us, you'll be able to make an informed decision. We are so committed to teaching about in-ears that we started the [UE University](#) to answer all of your technical questions and to keep you up to date with the latest industry-standard best practices.
- 3) If this is the first time you've worked with in-ears, we will help design your [entire wireless and in-ear set up](#) from start to finish. We can bundle Sennheiser wireless transmitters and receivers with your custom in-ear monitor purchase or for more advanced needs, we will put you in touch with one of the best tour rental houses in the business.
- 4) We understand the financial commitment that it takes to transition into IEMs so we've designed a custom dual-driver in-ear monitor for only \$399. That's more economical than some universal headphones!
- 5) And lastly, when you have questions that come up on the road, we have a dedicated [Tour Support Specialist](#) who is here to help make sure that your transition into in-ears is as easy as possible.
