

# Energy and Emissions

## Manufacturing Facilities

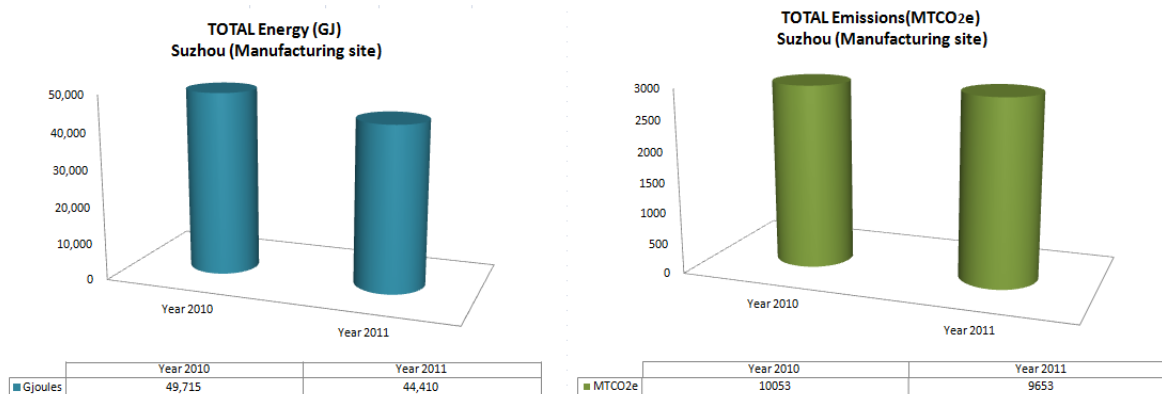

### Direct Energy and Emissions

### Indirect Energy and Emissions

### TOTAL Energy and Emissions

**FACTS:**

- ❖ 63% reduction in direct factory emissions V<sup>s</sup> 2010 due to elimination of onsite natural gas consumption
- ❖ Overall 1.3% reduction in indirect factory GHG emissions representing a reduction of 127 MTCO<sub>2</sub>e V<sup>s</sup> 2010 and contributing to the 10% indirect GHG emissions reduction goal of 2015 .
- ❖ Greenhouse gas emissions are shown in metric tonnes of carbon dioxide equivalent (MTCO<sub>2</sub>e)
