Setting up and using the folio with your iPad mini

Setting up your folio

1. Open the folio and insert your iPad mini into the holder.

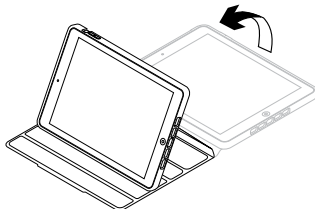

2. Push your iPad mini down:

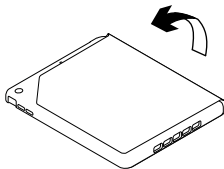

Using your iPad mini

Opening the folio wakes your iPad mini:

Closing the folio puts your iPad mini into sleep mode:

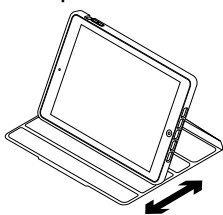

Four viewing positions

Your folio's flexibility means that you can choose the ideal position for the task you want to carry out with your iPad mini.

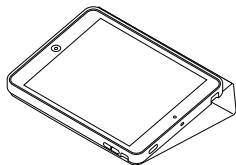

Four viewing positions are available for viewing media, typing, making FaceTime video calls and browsing.

Media position

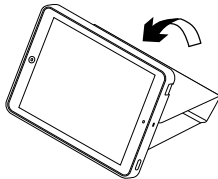

In the media position you can adjust your iPad mini to the angle you feel comfortable with.

Typing position

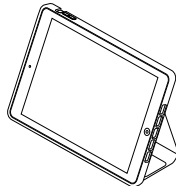

The typing position is ideal when using your iPad mini's iOS keyboard.

To put your folio in the typing position, hold your iPad mini (while still attached to the folio) with one hand, and with your other hand move the grip section of the protective cover behind your iPad mini.

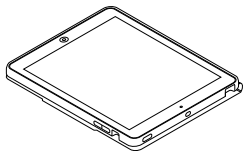

FaceTime position

FaceTime position is ideal for FaceTime video calls with your friends.

The folio setup for FaceTime position is the same as for the typing position - just turn it over so that your iPad mini is standing up.

Browsing position

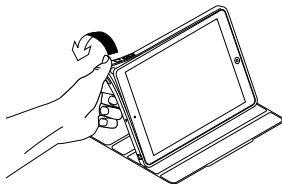

The browsing position lets you use your iPad mini easily with one hand.

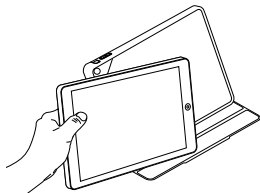

To put your folio in the browsing position, fold it back along its spine.

Detaching your iPad mini

1. Bend back the protective shell on the camera hole side to release your iPad mini:

2. Remove your iPad mini from the shell:

Troubleshooting

My iPad mini won't stand in the media position.

- Make sure your iPad mini is inserted in the iPad mini holder correctly.

My iPad mini won't wake when I open the folio, and doesn't go into sleep mode when I close it.

- Make sure your iPad mini is inserted in the iPad mini holder the right way round.
