BUSINESS PRODUCT CATALOG

FALL/WINTER 2014

Tools designed for the **ANYWHERE WORKPLACE.**

In **The New Office**, work happens anytime, anywhere. Now Logitech has developed a new generation of ingeniously designed peripherals specifically for business with:

- Intuitive, ergonomically-inspired designs that let users work comfortably and productively anywhere
- Brilliantly simple UC solutions that real people love to use
- Breakthrough technologies that come from years of R&D, like wireless solar keyboards, 1080p HD video, and Darkfield Laser Tracking™
- Simplicity that liberates IT and lets users plug it in and forget it

Logitech Business Tools Mice

Logitech mice and trackballs are the preferred choice for businesses and employees worldwide.

Performance Mouse MX™

Delivers sensational comfort and precise tracking on virtually any surface—even glass.

- Darkfield Laser Tracking™ for precise cursor control—even on glass (4mm+ thick)
- Ends battery hassle and downtime by recharging, even when mouse is in use
- Hyper-fast scrolling for long pages
- Sculpted right-handed shape with programmable stealth thumb controls⁴

\$99.99; Part # 910-001105

Anywhere Mouse MX™

Comfort and control meet in this compact, ergonomically designed mouse that works on any surface—even glass.

- Darkfield Laser Tracking for precise cursor control—even on glass (4mm+ thick)
- Hyper-fast scrolling for long pages
- Forward and back thumb buttons—flip through web pages and photos faster than ever⁴

\$59.99; Part # 910-002896

Marathon Mouse M705

Uses less than half the power of comparable mice, delivering up to three full years between battery changes.⁶

- Sculpted right-hand design with three integrated thumb buttons
- Hyper-fast scrolling for long pages

\$49.99; Part # 910-001935

Wireless Mouse M560

Comfort and workplace productivity come together with this full size and ambidextrous design, and hyper-fast scroll.

- 18 month batter life⁶
- Windows® 8 shortcuts

\$39.99; Part # 910-003880

WORK ON VIRTUALLY ANY SURFACE WITH DARKFIELD LASER TRACKING™

In The New Office, work happens anywhere. So a mouse has to work anywhere too. Optical and traditional laser mice use irregularities in the surface to track the direction and speed of your mouse. The more irregularities on a surface, the easier it is for the sensor to track movements. But use that same standard mouse on smooth, glossy surfaces like clear glass, and there just aren't enough imperfections for it to work. Logitech® Darkfield Laser Tracking™, featured in the **Anywhere Mouse MX™** and the **Performance Mouse MX™**, tracks the smallest possible details to create a micro roadmap of any surface. The result is razor-precision control.

Experience the difference.

DARKFIELD
Laser Tracking

Wireless Mouse M525

A perfect mix of performance and precision. An ergonomic design and micro-precise scroll wheel guarantee comfortable productivity.

- 3-year battery life⁶
- Unifying-receiver compatible

\$39.99

SEAMLESS SUPPORT FOR WORKPLACE TRENDS

Technology is evolving at a revolutionary pace, and so are the infinite ways work happens. As the very concept of “workplace” expands and changes, Logitech solutions facilitate and support the productivity, flexibility—and possibilities—of the Anywhere Workplace.

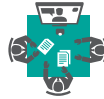

On-the-go workspaces

Our tablet keyboards and P710e Mobile Speakerphone can keep any workspace - from airports to hotel rooms, productive and distraction-free.

Open-concept offices

Help them focus. Our stereo headsets are ideal for users who need to block off surrounding noise in busy office environments.

Online collaboration

Help workers take advantage of true group collaboration with ConferenceCams. Now groups can meet face to face over video.

The shrinking desktop

With desktop real estate at a premium, choose compact wireless keyboards and mice to minimize desktop clutter.

Home office

Help remote workers be as productive and effective as possible - as if they were communicating face to face - with life-like HD-quality webcams.

Bluetooth® Multi-Device Keyboard K480

A keyboard for your computer that also works with your tablet or smartphone.

- Windows® and Mac®, Android™ and iOS
- Easy-Switch™ dail to switch between up to 3 Bluetooth® enabled devices

\$49.99

FREE YOURSELF, FREE YOUR TOOLS, WITH LOGITECH'S UNIFYING RECEIVER

Better

In The New Office, work is constantly on the move. That's why work tools have to move with it. The Logitech® Unifying receiver is a tiny, leave-in wireless USB device that controls mice and keyboards. It stays plugged into a PC's USB port and lets users easily connect up to six compatible wireless mice and keyboards to the same receiver. No need to have a USB receiver for each device you use.

Experience the difference.

 Look for this symbol for the Logitech® Unifying receiver.

Good

Best

Better

OFFICE TOOLS THEY'LL BE HAPPY TO USE

Logitech's keyboards and mice come with user-friendly features that help ensure seamless deployment and adoption with minimal support.

Sleek Design

Full-size keyboards and whisper-quiet keys make typing intuitive and efficient. Ergonomic design keeps hands happy and provides comfort for all-day use.

Longer key travel

Laptops typically have a key travel (how far down the key moves when you press it) of 2 to 2.5mm, but our research shows that a longer key travel – like our PerfectStroke™ keys at 3.2mm – improves typing comfort.

Logitech Unifying™ USB receiver

Connect up to six compatible wireless devices using a single USB port, storable within the mouse during travel.

Plug-and-play simplicity

Setup takes seconds—simply plug the wireless receiver into the USB port on a computer and start using the keyboard and mouse right away without software.

* Features vary by model. Check product specifications for full list of model-specific features.

Wireless Combo MK520

Sleek keyboard-and-mouse combo that puts convenience and control comfortably at your fingertips.

- Instant Media Access
- Three years of power without keyboard battery change⁶
- Full-sized layout

- Sleek design
- Plug-and-play simplicity
- Extended battery life
- Four re-programmable F-keys and six re-programmable hot keys⁷

\$39.99
Part # 920-004445

Media Combo MK270

Fast and reliable keyboard and mouse connectivity of up to 10 meters with Logitech Advanced 2.4 GHz wireless, even in the busiest environments.

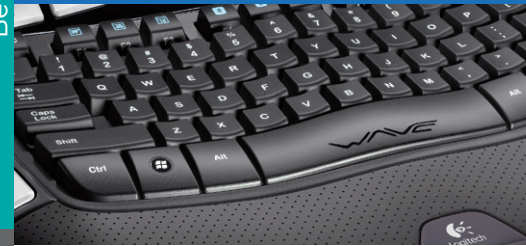

- Internal unifying receiver storage compartment in mouse
- 24-month keyboard and 12-month mouse battery life⁶ plus auto-sleep

\$29.99
Part # 920-004536

 Look for this symbol for the Logitech® Unifying receiver.

Better

GET COMFORTABLE WITH AN ERGONOMICALLY-DESIGNED KEYBOARD

In The New Office, using a mouse and keyboard should be naturally comfortable. That's what prompted us to create a line of comfortable keyboards and mice. For example, our **Wireless Wave Combo MK550** wave keyboard design doesn't force users to conform to it, but rather it conforms to them. With a subtle five-degree curve designed to let your hands open up and take a natural position, your wrists are never forced to bend. We added gentle indents to position your hands comfortably on the keyboard, along with padded, soft upholstery so you'll have a cushy place to rest your palms. Independent studies show that the Wave keyboard significantly reduces the four major points of discomfort—without causing a noticeable change in typing speed or accuracy.*

Experience the difference.

*According to studies by two U.S. universities.

Logitech Business Tools Speakers

Get the most from your audio with Logitech speakers, available in a range of sizes and styles.

Logitech Business Audio: THE LOGIC OF THE TECHNOLOGY

For over three decades, we've delivered innovative solutions for making the computer experience increasingly effortless for millions. As a world leader in PC and gaming headsets, earphones and speakers, all our audio products go through a strict testing process in our 44,000 square foot world-class audio design center in Camas, Washington.

If it's got a speaker, Logitech engineers are passionate and meticulous about producing the best acoustic results possible. Sound quality is fine-tuned and refined with sophisticated instruments and custom testing environments like anechoic and electromagnetic compatibility chambers and the acoustic immersion room shown above.

The results are clearly audible in every one of our business audio products.

Logitech offers a range of brilliantly designed UC tools that are so intuitive, people actually love to use them. Tools designed for real people.

Professional webcams and the ConferenceCam bring true-to-life HD quality to collaboration. USB headsets and a USB/Bluetooth® speakerphone deliver enterprise-grade audio with user-centric features.

A revolutionary UC keyboard combo provides UC audio and video control at the user's fingertips.

Logitech helps businesses unleash productivity and UC collaboration—from the desktop to the conference room—with tools that adapt to the way people work and not the other way around. With Logitech, the promise of UC for real people is fulfilled.

PARTNERSHIPS

Microsoft® Lync™ + Logitech

Logitech has partnered with Microsoft Lync to offer a range of fully-optimized-for-Lync UC tools that are so intuitive, people actually love to use them.

As one of the first companies to develop unique Lync 2013 features, Logitech enhances the Lync collaboration experience in the richest way. With HD video in a wider field of view, it's now possible to present from a whiteboard, show a document or conduct a demo in clear view all from your desktop. See who's talking with intelligent face-tracking during a video meeting.⁵ Easily manage audio and video calls through intuitive controls on your headset, ConferenceCam, speakerphone or through the webcam software.

www.logitech.com/lync

Cisco® + Logitech

Logitech has partnered with Cisco to develop a new way to control the Jabber® collaboration experience. This solution fits the ever-shrinking desktop so it's perfect for small workspaces, hot desking and cubicles. This first-ever UC keyboard combo brilliantly integrates voice, video and messaging into a keyboard and makes it easy to collaborate while staying productive. The result: more productivity and a better UC adoption rate within organizations. Make the most out of the Jabber experience with Logitech.

www.logitech.com/cisco

The same webcam that is included in the UC Solution for Cisco 725-C can also be purchased individually. Designed exclusively for Cisco, this professional HD webcam seamlessly integrates with Cisco solutions to bring face-to-face communication to the collaboration experience.

- HD 1080p² video at up to 30 frames per second
- UVC H.264 encoding technology
- 78-degree field of view with true widescreen

\$119.99

Part # 960-000945

UC Webcams For Face-to-Face Communication

Our HD webcams put people in the same room without putting them on costly flights. Now face-to-face collaboration doesn't have to include airline food and jet lag. Make UC accessible at the desktop with our full range of easy-to-use webcams.

WHY BUSINESS CERTIFICATION MATTERS

Even though most PC webcams and headsets are USB video-class compliant, it is important that the devices you purchase have a true UC application certification to ensure a seamless integration with your UC client. For example, Microsoft® and Cisco® have a stringent testing process which each audio or video product must pass in order to attain official Lync™ or Jabber® certification. All of Logitech's UC products hold a certification by leading UC platforms, and in some cases as a result also offer unique and enhanced feature sets when used with these platforms. For example, when used with the right platform, our ConferenceCam offers intelligent face tracking, the H820e and H650e headsets offer an in-call red LED light to keep others from interrupting during a call, the UC Solution for Cisco 725-C enables the Cisco Jabber™ experience to be controlled directly from the keyboard, and the P710e Speakerphone allows answer/end directly from the base.

Webcam C930e

Logitech's most advanced HD business webcam yet. Enables true-to-life collaboration with the widest-ever field-of-view in a business webcam. As the first webcam with HD 1080p H.264/SVC UVC 1.5 encoding, video is processed within the camera and adjusts dynamically to the available bitstream. The result is a smoother video stream in applications like Microsoft® Lync™ 2013.

- HD 1080p video quality at 30 frames-per-second
- H.264 with Scalable Video Coding (SVC) and UVC 1.5 encoding technology
- 90-degree diagonal field of view
- Pan, tilt and zoom option controlled by software
- ZEISS® glass lens
- Convenient privacy shutter

\$129.99

FOCUS ON END USERS

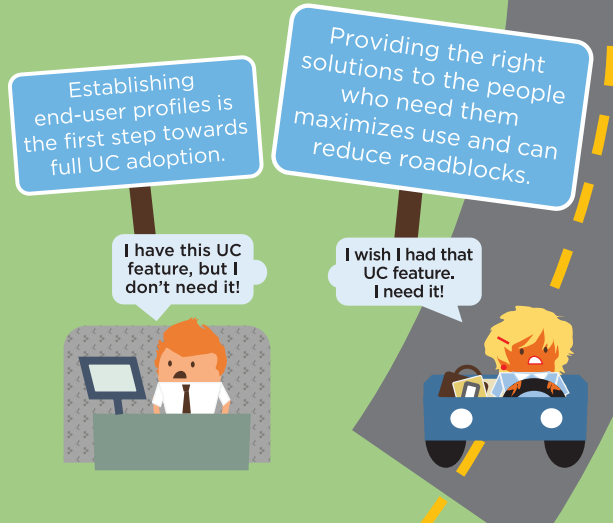

UC represents an opportunity to bring collaboration to the next level. According to Wainhouse Research, "By increasing your focus on your end users, you can ensure you are placing proper focus on the right areas and ultimately create a comprehensive and functional communications environment. This approach should allow you to meet both enterprise and end-user requirements alike in the most cost effective and efficient manner possible."

Administrative Assistant

- Supports multiple people
- Confidentiality is part of the job, so security features are important

Road Warrior

- Always on-the-go
- Communicates primarily via mobile and video
- IP Voice and Video are essential

B910 HD Webcam

Better

Good

H.264 VIDEO COMPRESSION

More than any other single factor, advances in compression technology have made desktop video practical, affordable—and lately, it seems, everywhere.

The most efficient and popular compression technology is currently H.264, the video compression standard featured in the Logitech Webcam C930e, C920-C Webcam, and our ConferenceCams.

H.264 substantially improves compression performance over previous standards with no visible degradation of image quality. H.264 compression reduces the size of a given digital video stream by > 80% compared to Motion JPEG (M-JPEG) and as much as 50% compared to the MPEG-4 standard. The benefit is that much higher video quality can be achieved per given bit rate with H.264 because so much less network bandwidth is required to transmit any video signal it encodes.

ConferenceCams For Group Video Meetings

Gone are the dinosaur days of proprietary, complex, and ultra-expensive video-conference systems. Welcome a whole new era of business-grade video conferencing defined by UC application independence, ease of use, affordability...and flexibility.

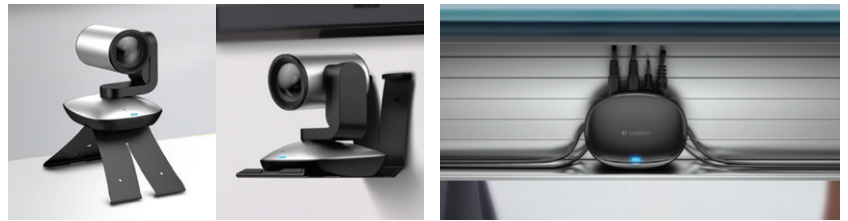

ConferenceCam CC3000e

Turn any meeting room into a face-to-face video-enabled collaboration room.

With breakthrough affordability and USB plug-and-play ease of use, the CC3000e brings video-enabled conference rooms to the masses. UC platform-independent design enables users to conduct life-like group conference meetings through the desktop video conferencing program of their choice.

The 90-degree FOV with mechanical 260-degree pan and 130-degree tilt is ideal for mid-sized group meetings.

Touch an NFC-enabled mobile device over the base console to instantly pair and enjoy professional speaker-phone audio quality.

ConferenceCam CC3000e

Turn any meeting space into a video-enabled collaboration place. By using your familiar computing environment and UC application of choice, the CC3000e is plug-and-play and easy to deploy. Workgroups of 6-10 people can now experience the productivity benefits of crystal-clear face-to-face communication.

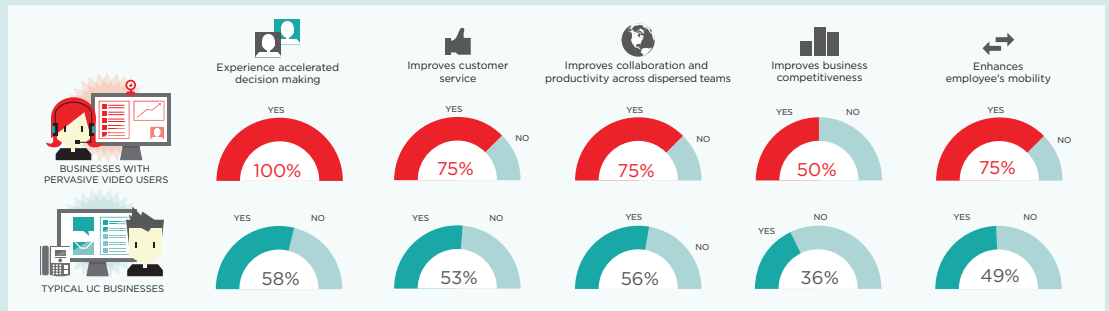

- HD 1080p video at up to 30 frames per second
- Built-in omni-directional full duplex mics and noise cancelling mic
- 10x lossless zoom and autofocus with ZEISS® lens optics
- LCD displays caller ID and other info¹
- Touch controls and dockable remote control
- Far end camera control¹⁵
- USB plug and play connectivity

\$999.99
Part # 960-000982

VIDEO CONFERENCING IS A KEY DRIVER FOR OVERALL UC SUCCESS

According to Frost & Sullivan, "Businesses where video conferencing is deployed extensively at all levels also use other UC tools on average 30 percent more than other organizations." Frost & Sullivan research also shows the following benefits of pervasive video:

Source: Frost & Sullivan: "Aiming to Increase UC Adoption? Look to Video. Pervasive Video Users Embrace UC by 30 Percent More," 2014

BCC950 ConferenceCam

Small group video conferencing has arrived—everywhere.

Now groups can collaborate over video from anywhere - no more competing for those overbooked conference room systems or huddling around a single PC just to have a video meeting.

Remote control and base button controls for pan, tilt and zoom, answer/hang-up, volume and mute.

BCC950 ConferenceCam

Combines professional HD video and superior speakerphone audio. Perfect for enabling small groups to have video meetings in conference rooms, offices and collaboration areas. Now small teams don't have to compete for those overbooked video meeting rooms or huddle around a single PC just to have a video meeting.

- HD 1080p video at up to 30 frames per second
- Built-in full duplex speakerphone and noise-cancelling mic
- ZEISS® optics with autofocus
- 78-degree FOV with 180-degree camera pan
- USB plug and play connectivity

\$249.99
Part # 960-000866

UC Audio For Distraction-Free Communication

Crank up your team's productivity. With enterprise-quality performance, plug-and-play compatibility and intuitive, user-friendly design, Logitech UC Audio is engineered to GET. THINGS. DONE.

READY TO ROCK

Wireless Headset H820e

Enterprise-grade wireless communication for maximum UC productivity.

- DECT spectrum wireless connectivity
- In-call LED indicator light³
- On-boom mute button and mute indicator LED light
- Intuitive on-ear call controls
- Up to 10 hours of wideband talk time
- Logitech Sound Protection

Dual: \$199.99; Part # 981-000516
Mono: \$179.99; Part # 981-000511

USB Headset H650e

Comfortable, stylish enterprise quality communication for all-day productivity.

- Dynamic equalizer
- Acoustic echo cancelation and noise-cancelling microphone
- In-call LED indicator light³
- Flexible microphone boom
- Quick-access inline controller

- Logitech Sound Protection

Stereo: \$89.99; Part # 981-000518
Mono: \$79.99; Part # 981-000513

USB Headset H570e

Enterprise-grade communication, comfortable fit and unmatched by the competition.

- Padded, metal-reinforced headband and replaceable leatherette earpads
- Intuitive inline controls
- Digital signal processing (DSP)
- Logitech Sound Protection

Stereo: \$49.99; Part # 981-000574
Mono: \$44.99; Part # 981-000570

Best
Better
Good

It's no wonder that Logitech is the long-standing No. 1 brand in headsets.¹

We've taken our decades of headset expertise, our successes developing audio products for the consumer market and our state-of-the-art testing know-how to develop business audio products that improve business user experience.

World-class audio design and testing

Logitech R&D combines computer modeling with real world testing when creating new business audio products. The result great sound, optimized performance, and compliance-tested assurance that our business audio products do not interfere with customer's existing products.

Professional, distraction-free plug-and-play communication

Logitech's enterprise-grade audio delivers crystal-clear sound while user-centric features like intuitive on-ear controls. In-call LEDs and incoming call indicators bring harmony to UC. Plus our audio products are plug-and-play for easy deployment and easy use.

Trusted by Businesses, Loved by Employees

For years, we've been developing products that take 6+ hours of use day after day and are instruments to keeping businesses productive and employees happy. It's in our DNA Logitech's business audio solutions are designed to be so intuitive that people actually love to use them.

Mobile Speakerphone P710e

Set up an instant conference room with hands-free, professional audio and second-screen flexibility.

- Integrated mobile device stand
- USB and *Bluetooth*® connectivity with NFC pairingⁱⁱ
- Digital Signal Processing (DSP) for enterprise-quality audio
- Up to 15 hours of talk time

\$169.99; Part # 981-000741

Speakerphone

DECT, *Bluetooth*® and the Freedom to Roam

DECT and *Bluetooth*® wireless audio products operate on different radio frequencies and can therefore easily co-exist in the same environment. But DECT wireless headsets have a clear advantage over *Bluetooth*® devices for two reasons: less interference and substantially greater range.

Because *Bluetooth*® shares the same frequency as wireless networks (specifically 802.11 b/g/n Wi-Fi products), wireless security systems, and other electronic devices, there is the potential for interference between these devices. DECT operates on a separate frequency that eliminates potential interference from these type devices normally found in office environments.

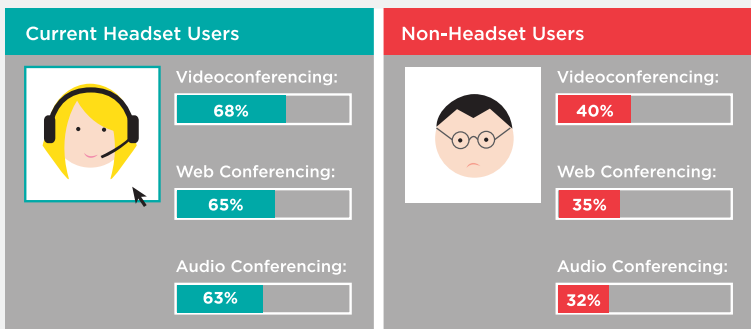

DECT wireless headsets also have a larger maximum roaming range. Most *Bluetooth*® products have a maximum range of 10 meters. DECT wireless headsets have a standard range of 100+ meters—10x the range and greater freedom to roam.

UC Headsets Strengthen Overall UC Adoption

FROST & SULLIVAN

HEADSET USERS UTILIZE OTHER UC TECHNOLOGIES

up to 2.5 times more than knowledge workers without headsets.

Logitech International
Americas Headquarters
7600 Gateway Blvd.
Newark, CA 94560

¹ With Microsoft® Lync™, Skype™, Cisco Jabber™, Lifesize® Cloud™ and Vidyo® deployments.

² Supported video modes vary by application/client.

³ With Microsoft® Lync™ and Cisco® deployments. See www.logitech.com/ciscocompatibility for the latest version. Works with Skype using plug-in (select the appropriate product and download at www.logitech.com/support/business-products).

⁴ Requires Logitech SetPoint software (Windows) or Logitech Control Center software (Mac OS X), available for download at logitech.com/downloads.

⁵ With Microsoft® Lync™, Vidyo® and Lifesize® Cloud™ deployments. Lync requires a plug-in.

⁶ Battery life may vary based on user and computing conditions.

⁷ Windows users only, customization is done through SetPoint™ software or Logitech Options Software depending on the product.

⁸ Allow three to six hours for a full charge.

⁹ Keyboard battery life calculation based on an estimated two million keystrokes per year in an office environment. User experience may vary.

¹⁰ See www.logitech.com/ciscocompatibility for the latest version.

¹¹ With NFC-enabled mobile devices.
