RESTRICTION, EVALUATION, AUTHORISATION AND RESTRICTION OF CHEMICAL SUBSTANCES (REACH) DECLARATION

The European Registration, Evaluation, Authorisation and Restriction of Chemical Substances regulations (the “REACH Regulations”) were first introduced in 2006, to further improve EU regulation of chemicals, with the aim of advancing public health and safety and protection of the environment. This declaration shares our approach to managing chemicals in line with all legal requirements (including REACH) and industry good practice. This declaration is communicated via our website as evidence of our commitment in this regard.

REACH registration is required prior to producing or importing more than 1 ton per annum (tpa) of regulated chemicals into the EU. Logitech does not produce or import more than 1 tpa regulated chemicals.

REACH Regulations define a number of Annex XVII Restricted Substances. Where relevant, those restrictions are reflected in our Global Specification for the Environment (GSE) and all products comply with the specified restrictions.

Products must be registered with ECHA if significant volumes of regulated chemicals could be released from the product over time. As part of our product testing programme, we test an appropriate sample of Logitech products on a periodic basis. Our analysis shows releases from our products are not likely to occur at levels that would require registration under REACH. Article registration requirements do not therefore apply to Logitech.

REACH Regulations also define a number of Substances of Very High Concern (SVHC). The European Chemicals Agency (ECHA) must be notified prior to import or manufacture of more than 1 tpa of SVHCs. Logitech does not import or manufacture more than 1 tpa of SVHCs. A public declaration is required if a manufacturer produces products, which may contain more than 0.1% concentration of SVHC weight by weight (w/w), at the article level. The products listed below include articles, which may contain SVHCs above the threshold level of 0.1% weight by weight. Note that the products listed in the following table are manufactured by the Logitech house of brands, which currently comprises four master brands: Logitech, Logitech G, Ultimate Ears and Jaybird.

Product	Article containing SVHC*	SVHC information	
		Substance name	CAS number
Wireless keyboards	Coin cell battery	1,2-dimethoxyethane, ethylene glycol dimethyl ether (EGDME)	110-71-4
Tablets			
Remotes			
Smartphone accessories			
Home switches			
Wireless cameras	Lithium battery	1,3-propanesultone	1120-71-4
Wireless headsets			
Wireless keyboards			
Wireless mice			
Tablets			
Mobile speakers			
Wireless touchpads			
Wireless gamepads			
Remotes			

* Based on the current SVHC list, as maintained on the ECHA website ([here](#))

All other Logitech products do not contain SVHCs in excess of 0.1% (w/w).
