PRODUCTIVITY MEETS COMFORT AND STYLE

Stylish and resilient, Logitech® headsets deliver clear audio with features like acoustic echo cancellation and noise-cancelling mics.

Logitech Audio Devices

Logitech headsets and audio solutions enhance collaboration in any workspace. Our premium-quality professional headsets offer style, affordability, life-like sound and all-day comfort. Designed with the business user in mind, Logitech provides flexibility to match individual needs with specific headset options. Single-ear (mono) headsets, for example, are ideal for users who prefer keeping an open ear to their surroundings.

Double-ear (stereo) models are perfect for those who need to block off surrounding noise for laser-like focus during desktop calls. Corded headsets? Wireless? DECT? “Yes” to all the above.

Logitech professional headsets are USB plug and play, certified for Skype® for Business and compatible with all leading video conferencing applications so are always ready for your next call.

From the stylish and durable wireless Headset H820e that delivers crystal clear sound at an affordable price to the Mobile Speakerphone P710e that instantly turns any workspace into a conference space; Logitech’s lineup of business audio solutions makes every call more productive.
