

# Wheel Mouse

**Maximum performance  
and precision**

**optical**

Now you're free to choose where and how you work. This innovative mouse with Logitech's optical technology works just as well on the arm of a sofa as it does on your desk. You never need a mouse pad. This high-performance mouse from the optical experts also offers an innovative design for maximum comfort and control, fast scrolling and easy web navigation. So sit back and enjoy the full convenience of a mouse no matter where you use your computer.

#### **Get more performance from your mouse**

This high-precision mouse glides across hundreds of surfaces, recording motion optically without a ball or rollers. There are no moving parts to break down. It doesn't need a mousepad. And, even after months of use, you'll never have to stop to clean it.

#### **Choose a mouse from the optical experts**

For more than five years, Logitech has been building optical technology into our award-winning, smooth rolling trackballs that eliminate the need for regular cleaning. Now we've brought this optical experience to our high-precision mice.

#### **Designed to fit your hand**

Logitech's revolutionary mouse shape nestles comfortably in your hand, and puts the buttons and scroll wheel at your fingertips. It's made to provide comfort and control for either your right or left hand. MouseWare makes it easy to make the left or right button your main click button.

#### **Never use scrollbars again**

Use the scroll wheel for fast, easy scrolling in your applications. Just move the wheel to scroll, without having to move the mouse or click in scrollbars. The scroll wheel is also a third button.

#### **Easily navigate the web**

Just click the scroll wheel and Logitech's WebWheel™ feature pops up to give you easy access to browsing commands and web sites, without leaving your current application. Roll the wheel to move back, go to the next page, select another command or go directly to your favorite sites. WebWheel comes with five pre-set sites and makes it simple to customize these sites and update your choices any time.

# Wheel Mouse

## Maximum performance and precision

### Save time with one-click shortcuts

Logitech® MouseWare® software already assigns double clicking with a single click and other step-saving shortcuts to the buttons.
