### English
#### Product features
1. G-keys—Programmable keys that you can customize to create a profile for individual games or applications.* A profile defines what a G-key does when you press it.
2. M-keys—Each M-key extends the capability of the G-keys, allowing you to assign up to 3 different key configurations to each profile for your G-keys. This allows you to react to different game scenarios in a single profile by switching between the M1, M2 and M3 keys.*
3. MR-key—Use this key to record quick macros.* For instructions, see Recording a quick macro in this guide.
4. Game/desktop mode switch—Disables/enables the Windows/Context Menu keys so you won't activate these Windows features by accident during a game.
5. Fn + F6 = Mute
6. Fn + F7 = Volume down
7. Fn + F8 = Volume up
8. Fn + F9 = Play/Pause
9. Fn + F10= Stop
10. Fn + F11 = Previous/Rewind
11. Fn + F12 = Next/Fast forward
12. Backlight key—Controls the backlight intensity (off, 50%, or 100%)

**Recording a quick macro***
Your keyboard has six programmable G-keys that handle up to three macros each, giving you up to 18 unique functions per game.
1. Press the MR key.
2. Press a G-key.
3. Type the keys you would like to record.
4. Press the MR key.

For more information about programing the G-keys and other keyboard features, refer to the Logitech Gaming Software Help.

*Requires the download and installation of the Logitech Gaming software.
