

## LOGITECH EUROPE S.A. COMPLIANCE WITH THE WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT (WEEE) EUROPEAN DIRECTIVE

Dear Partner

The European Union Waste Electrical and Electronic Equipment (WEEE) Directive (2002/96/EC) which sets collection, recycling and recovery targets for Electrical and Electronic goods placed on the EU Market has been implemented into national legislations of the EU member states.

According to the European Directive, the national WEEE legislation shall make producers of electrical and electronic equipment responsible for the collection and recycling of such waste equipment and Logitech wishes to share with you how we meet our obligations under this Directive.

Logitech is committed to strict compliance with all applicable laws and regulations, including European and Member State WEEE legislation and therefore, Logitech complies with the WEEE Directive requirements and, where it is made possible by national legislation, Logitech is registered directly with the National WEEE registry and/or National WEEE scheme and takes direct financial and administrative responsibility for WEEE reporting, recovery and recycling of all Logitech branded retail products placed on the relevant national market.

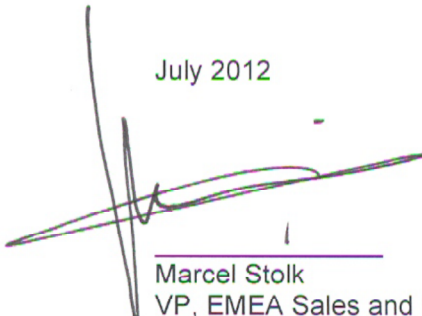

In addition, all Logitech branded retail products fully comply with the marking requirements of the WEEE Directive and resulting national regulations and therefore display the crossed-out wheellie bin symbol on the product.

In addition, Logitech is an active member of the European Recycling Platform (ERP) which is a pan-European WEEE compliance scheme setup in 2002 to ensure a cost-effective implementation of the national WEEE schemes administered directly by ERP. Logitech's membership of ERP is your assurance that Logitech branded retail product benefits from the most cost effective WEEE scheme within the countries in which ERP currently operates.

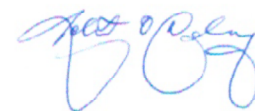

Logitech's preference remains, where possible, to continue to operate within the relevant ERP national scheme, but where ERP does not operate in a specific country then Logitech has become a member of an efficiently operated and recognised National WEEE scheme which will allow us to take direct producer responsibility for the Member State in which that scheme operates.

Logitech remains dedicated to ensuring a continued successful implementation of this program and any additional questions on this subject may be emailed to [ww\\_compliance@logitech.com](mailto:ww_compliance@logitech.com).
