**1****2**

Your Daedalus Apex is ready to play games.  
If you would like to customize your  
Daedalus Apex, refer to the next section.

**3**

You can customize the onboard profiles  
of the Daedalus Apex—surface tuning,  
button programming, tracking behavior,  
and lighting—using the Logitech  
Gaming Software. Download this software  
and learn how to customize the Daedalus  
Apex at [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## 6 fully programmable buttons

1. Left (Button 1)
2. Right (Button 2)
3. Wheel click (Button 3)
4. Back (Button 4)
5. Forward (Button 5)
6. DPI cycle (Button G6)

### **Default Settings:**

DPI Values: 400/800/1600/3200

USB Report Rate: 1000/sec (1ms)

Logo lighting: On, with color cycling effect

Side lighting: On, with color cycling effect

## Onboard profile

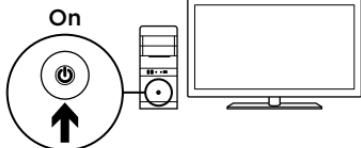

Daedalus Apex allows you to tweak your settings until they are perfect and store them in its onboard memory. You can assign multiple profiles and adjust button functions, DPI values, USB report rate, and lighting colors and effects using the optional Logitech Gaming Software, available for download from [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## Tips

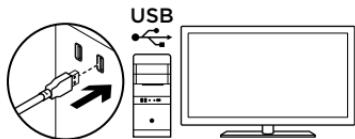

Try the default profile settings in practice games before changing these settings.

By default, Logitech Gaming Software changes the onboard memory of the mouse. By selecting “Automatic Game Detection” from the home view, advanced gamers can customize each game according to their specific button configuration and sensitivity switching needs. The Logitech Gaming Software stores this information and applies it automatically when the game is detected.

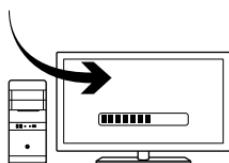

1

3

Deine Daedalus Apex will spielen.  
Informationen zur Anpassung  
Deiner Daedalus Apex findest Du  
im nächsten Abschnitt.

Du kannst die integrierten Profile  
der Daedalus Apex für Oberflächentuning,  
Tastenprogrammierung, Abtastverhalten  
und Beleuchtung mit der Logitech  
Gaming Software anpassen.  
Unter [www.logitech.com/support/g303](http://www.logitech.com/support/g303)  
sind die Software und Informationen zur  
Anpassung der Daedalus Apex verfügbar.

## 6 voll programmierbare Tasten

1. Links (Taste 1)
2. Rechts (Taste 2)
3. Mausradklick (Taste 3)
4. Zurück (Taste 4)
5. Vorwärts (Taste 5)
6. DPI-Wechsel (Taste G6)

### Standardeinstellungen:

DPI-Werte: 400/800/1600/3200

USB-Signalrate: 1000/Sek. (1 ms)

Logo-Beleuchtung:

Ein, mit wechselnden Farben

Seitenbeleuchtung:

Ein, mit wechselnden Farben

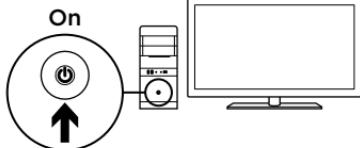

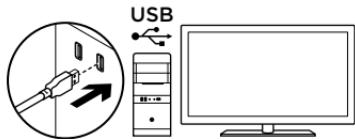

## Integriertes Profil

Mit Daedalus Apex kannst Du Deine Einstellungen individuell optimieren und sie im integrierten Speicher speichern. Mithilfe der optionalen Logitech Gaming Software, die unter [www.logitech.com/support/g303](http://www.logitech.com/support/g303) heruntergeladen werden kann, lassen sich mehrere Profile zuweisen sowie Tastenfunktionen, DPI-Werte, die USB-Signalrate und die Beleuchtungsfarben und -effekte anpassen.

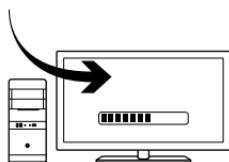

## Tipps

Teste vor dem Ändern von Einstellungen die Standardeinstellungen in Probespielen.

In der Standardeinstellung wird der integrierte Speicher der Maus durch die Logitech Gaming Software geändert. Durch Auswahl von „Automatische Spielerkennung“ in der Hauptansicht können erfahrene Spieler für jedes Spiel eine individuelle Tastenbelegung und Empfindlichkeitsumschaltung einstellen. Die Logitech Gaming Software speichert diese Informationen und wendet sie automatisch an, wenn das Spiel erkannt wird.

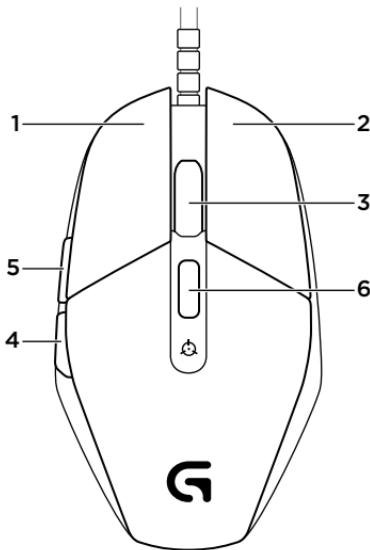

**1****2**

Votre souris Daedalus Apex est prête à l'emploi. Reportez-vous à la section suivante si vous souhaitez personnaliser son utilisation.

**3**

Il est possible de personnaliser les profils enregistrés de la souris Daedalus Apex, notamment le réglage de la surface, la programmation des boutons, le comportement de suivi et l'éclairage à l'aide de l'Assistant pour jeux vidéo de Logitech. Téléchargez ce logiciel gratuit et découvrez comment personnaliser votre souris Daedalus Apex, en vous rendant sur [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## 6 boutons entièrement programmables

1. Gauche (bouton 1)
2. Droit (bouton 2)
3. Clic de roulette (bouton 3)
4. Précédent (bouton 4)
5. Suivant (bouton 5)
6. Changement de résolution (bouton 6)

### Paramètres par défaut:

Valeurs PPP: 400/800/1600/3200

Taux de rapports USB: 1 000/s (1 ms)

Rétroéclairage du logo:

Activé, avec effet de variation des couleurs

Éclairage latéral:

Activé, avec effet de variation des couleurs

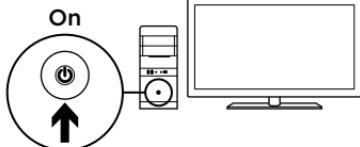

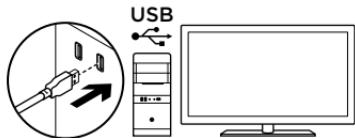

## Profil enregistré

Le modèle Daedalus Apex vous permet d'ajuster vos paramètres à la perfection et de les enregistrer dans la mémoire intégrée. Vous pouvez définir plusieurs profils et régler les fonctions des boutons, les valeurs PPP, le taux de rapport USB et les couleurs et le style de rétroéclairage grâce à l'Assistant pour jeux vidéo de Logitech facultatif, disponible au téléchargement sur [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

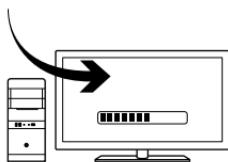

## Conseils

Avant de modifier les paramètres de profil par défaut, vérifiez d'abord leur efficacité dans le jeu.

Par défaut, l'assistant pour jeux vidéo de Logitech modifie la mémoire intégrée à la souris. En sélectionnant Détection de jeu automatique dans la vue principale, les joueurs expérimentés peuvent personnaliser chaque jeu selon leurs besoins spécifiques en matière de changement de sensibilité et de configuration de boutons. L'assistant pour jeux vidéo de Logitech stocke ces informations et les applique automatiquement lorsque le jeu est détecté.

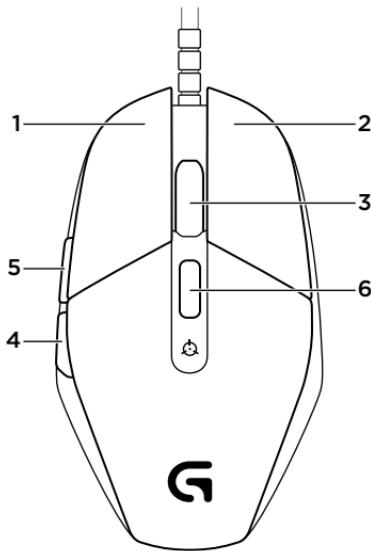

**1****2**

Daedalus Prime è pronto per giocare.  
Se si desidera personalizzare  
Daedalus Apex, consultare la sezione  
successiva.

**3**

È possibile personalizzare i profili integrati di Daedalus Apex (regolazione in base alla superficie, programmazione dei pulsanti, comportamento di tracciamento e illuminazione) utilizzando Logitech Gaming Software. Scaricare questo software e ottenere ulteriori informazioni su come personalizzare Daedalus Apex nel sito Web [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## 6 pulsanti programmabili

1. Sinistro (pulsante 1)
2. Destro (pulsante 2)
3. Clic con lo scroller (pulsante 3)
4. Indietro (pulsante 4)
5. Avanti (pulsante 5)
6. Ciclo DPI (pulsante G6)

### Impostazioni predefinite:

Valori DPI: 400/800/1600/3200

Frequenza di aggiornamento USB:  
1000/sec (1 ms)

Illuminazione logo:  
attiva, con scorrimento colori

Illuminazione laterale:  
attiva, con scorrimento colori

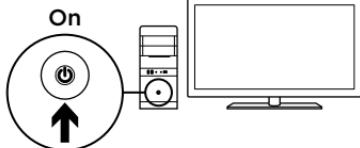

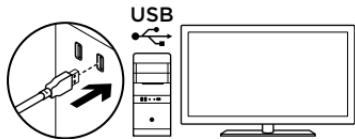

## Profilo integrato

Daedalus Prime consente di regolare le impostazioni alla perfezione e di memorizzarle nella memoria integrata. È possibile assegnare più profili e impostare le funzioni dei pulsanti, i valori DPI, la frequenza di aggiornamento USB e gli effetti di illuminazione utilizzando Logitech Gaming Software, scaricabile all'indirizzo [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

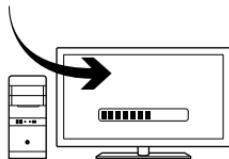

## Suggerimenti

Provare le impostazioni dei profili predefiniti durante le sessioni di gioco di prova prima di modificarle.

Per impostazione predefinita, Logitech Gaming Software modifica la memoria integrata del mouse. Selezionando Rilevamento gioco automatico dalla visualizzazione principale, gli utenti esperti possono personalizzare ogni gioco in base alla configurazione specifica dei pulsanti e alle esigenze di selezione della sensibilità. Logitech Gaming Software memorizza queste informazioni e le applica automaticamente quando rileva il gioco.

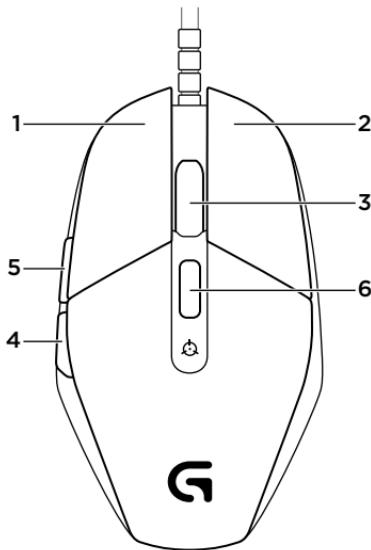

**1****2**

El ratón Daedalus Apex está listo para usar.  
Si quieres personalizar Daedalus Apex,  
consulta la sección siguiente.

**3**

Puedes personalizar los perfiles integrados  
en Daedalus Apex (ajustes de superficie,  
programación de botones, comportamiento  
de seguimiento e iluminación)  
mediante Logitech Gaming Software.  
Para descargar este software y aprender  
a personalizar Daedalus Apex, accede a  
[www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## 6 botones totalmente programables

1. Izquierda (botón 1)
2. Derecha (botón 2)
3. Clic con botón rueda (botón 3)
4. Retroceso (botón 4)
5. Avance (botón 5)
6. Ciclo de DPI (botón G6)

### Configuración predeterminada:

Valores de DPI: 400/800/1600/3200

Respuesta USB: 1000/s (1 ms)

Luz de logotipo: encendida, con ciclo de colores

Luz lateral: encendida, con ciclo de colores

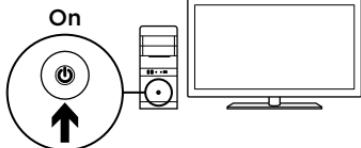

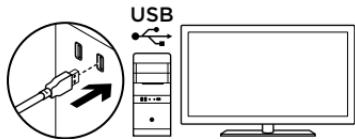

## Perfil integrado

Daedalus Apex te permite ajustar los parámetros hasta obtener una configuración perfecta y almacenarlos en la memoria integrada. Puedes asignar varios perfiles y ajustar las funciones de botones, los valores de dpi, la velocidad de respuesta USB, y los efectos y colores de iluminación usando Logitech Gaming Software (opcional), disponible para descargar desde [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

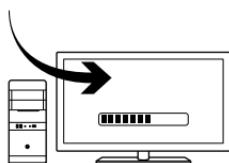

## Sugerencias

Antes de cambiar la configuración de los perfiles predeterminados, pruébala en algunos juegos.

De modo predeterminado, Logitech Gaming Software cambia la memoria integrada del ratón. Al seleccionar "detección automática de juegos" en la pantalla de inicio, los jugadores expertos pueden personalizar cada juego según los requisitos de configuración de botones y cambios de sensibilidad específicos. Logitech Gaming Software guarda esta información y la aplica automáticamente cuando detecta el juego.

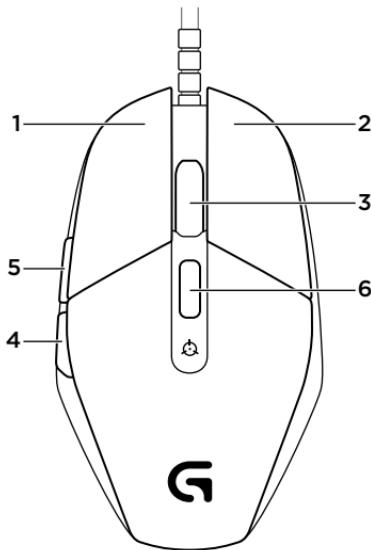

**1****2**

O seu Daedalus Apex está pronto para jogar. Se pretende personalizar o Daedalus Apex, consulte a secção seguinte.

**3**

Com o Logitech Gaming Software, pode personalizar os perfis integrados do Daedalus Apex: ajustamento da superfície, programação de botões, comportamento de rastreio e iluminação. Transfira este software e saiba como personalizar o Daedalus Apex em [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

6 botões totalmente programáveis

1. Esquerda (Botão 1)
2. Direita (Botão 2)
3. Clique da roda (Botão 3)
4. Retroceder (Botão 4)
5. Avançar (Botão 5)
6. Ciclo de PPP (Botão G6)

#### Predefinições:

Valores de PPP: 400/800/1600/3200

Taxa de relatório USB: 1000/seg. (1ms)

Iluminação do logótipo:

Activada, com efeito de ciclo de cores

Iluminação lateral:

Activada, com efeito de ciclo de cores

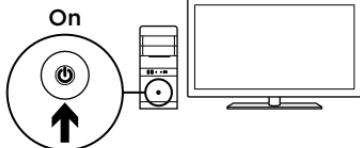

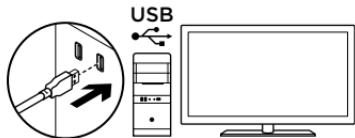

## Perfil integrado

O Daedalus Apex permite-lhe optimizar as suas definições até à perfeição e armazená-las na memória interna. Pode atribuir vários perfis e ajustar as funções de botões, os valores de PPP, a taxa de relatório USB e as cores e efeitos de iluminação com o Logitech Gaming Software opcional, disponível para transferência em [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

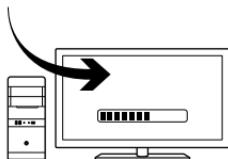

## Sugestões

Experimente as definições do perfil predefinido em jogos de treino antes de alterar estas definições.

Por predefinição, o Logitech Gaming Software altera a memória interna do rato. Ao seleccionar "Detecção automática de jogo" na vista inicial, os jogadores avançados podem personalizar cada jogo de acordo com as suas necessidades específicas de alteração de sensibilidade e de configuração de botões. O Logitech Gaming Software armazena esta informação e aplica-a automaticamente quando o jogo é detectado.

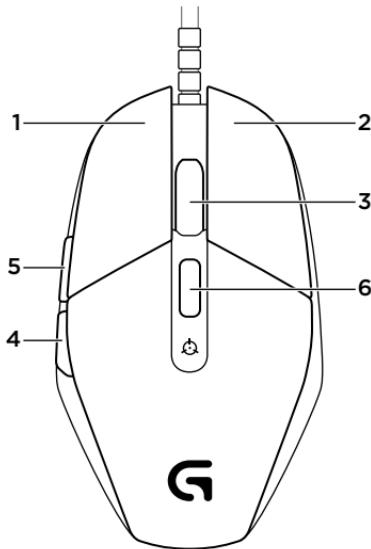

**1****2**

Je Daedalus Apex is klaar om te gamen.  
Ga naar de volgende sectie als je de  
Daedalus Apex verder wilt aanpassen.

**3**

Via de Logitech Gaming Software  
kun je de ingebouwde profielen  
van de Daedalus Apex aanpassen,  
waaronder oppervlakafstemming,  
knopprogrammering, trackinggedrag en  
verlichting. Download deze gratis software  
en ontdek hoe je de G300 kunt aanpassen,  
op [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## 6 volledig programmeerbare knoppen

1. Links (knop 1)
2. Rechts (knop 2)
3. Wielklik (knop 3)
4. Terug (knop 4)
5. Volgende (knop 5)
6. Dpi-lus (knop G6)

### Standaardinstellingen:

DPI-waarden: 400/800/1600/3200

USB-rapportagesnelheid: 1000/sec (1 ms)

### Logoverlichting:

aan met kleurwisselingseffect

### Zijverlichting:

aan met kleurwisselingseffect

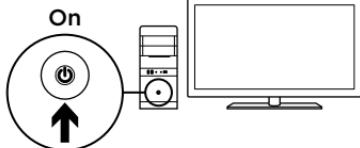

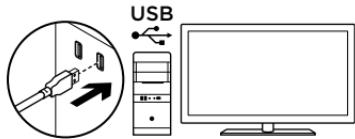

## Ingebouwd profiel

Je kunt je instellingen voor de Daedalus Apex verfijnen tot ze perfect zijn en dan opslaan in het ingebouwde geheugen. Je kunt meerdere profielen toewijzen en knopfuncties, DPI-waarden, USB-rapportagesnelheid en verlichtingskleuren en effecten aanpassen met behulp van de optionele Logitech Gaming Software, beschikbaar voor download op [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

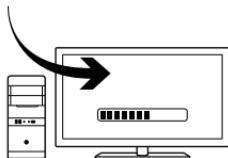

## Tips

Probeer de standaardprofielininstellingen uit in oefengames voordat je ze wijzigt.

Logitech Gaming Software verandert standaard het ingebouwde geheugen van de muis. Door in het startscherm 'Automatische gamedetectie' te selecteren, kunnen doorgewinterde gamers elke game aanpassen volgens hun specifieke vereisten voor knopconfiguraties en gevoeligheid. De Logitech Gaming Software slaat deze gegevens op en past ze automatisch toe wanneer de game gedetecteerd wordt.

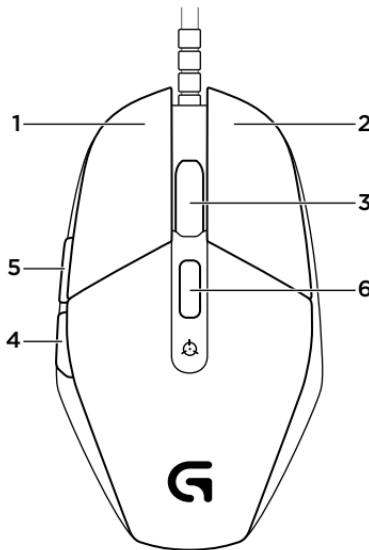

**1****2**

Nu kan du börja spela med din Daedalus Apex-mus. Om du vill anpassa Daedalus Apex-musen går du vidare till nästa avsnitt.

**3**

Du kan anpassa inbyggda profiler för Daedalus Apex – underlagskalibrering, programmering av knappar, avläsningskapacitet och belysning – med Logitech Gaming Software. Ladda ner den här programvaran och lär dig hur du kan anpassa Daedalus Apex på [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## 6 fullt programmerbara knappar

1. Vänster (knapp 1)
2. Höger (knapp 2)
3. Klicka på hjulet (knapp 3)
4. Bakåt (knapp 4)
5. Framåt (knapp 5)
6. Dpi-cykel (knapp G6)

### Standardinställningar:

Dpi-värden: 400/800/1600/3200

USB-rapporteringsfrekvens: 1 000/sek (1 ms)

Logotypbelysning: På, med färgväxlingseffekt

Sidobelysning: På, med färgväxlingseffekt

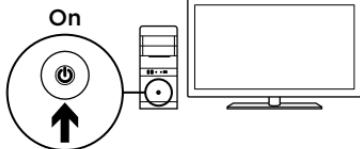

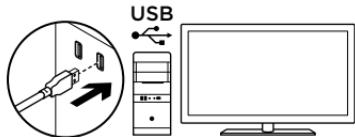

## Inbyggd profil

Du kan anpassa Daedalus Apex-inställningarna efter dina behov och sedan lagra dem i det inbyggda minnet. Du kan tilldela flera profiler och justera knappfunktioner, DPI-värden, USB-rapporteringsfrekvens, belysningsfärgar och effekter med det valfria Logitech Gaming Software som finns tillgängligt för nedladdning på [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

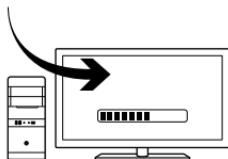

## Tips

Innan du ändrar inställningarna bör du först provspela med standardinställningarna.

Som standard ändrar Logitech Gaming Software det inbyggda minnet i musen. Avancerade spelare har möjlighet att anpassa varje enskilt spel efter specifika knappkonfigurationer och känslighetsbehov genom att välja Automatisk spelidentifiering. Denna information lagras i Logitech Gaming Software och tillämpas automatiskt när det aktuella spelet identifieras.

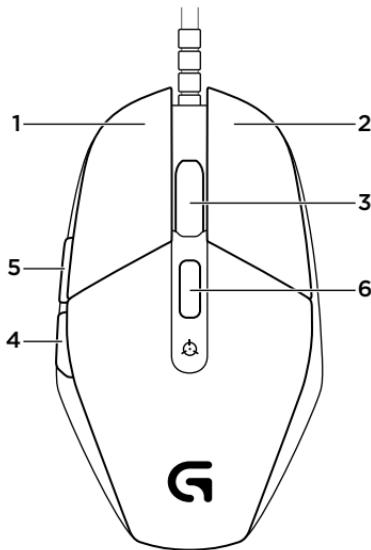

**1****2**

Du kan nu spille med Daedalus Apex.  
Hvis du vil tilpasse din Daedalus Apex,  
kan du læse mere i næste afsnit.

**3**

Du kan tilpasse de indbyggede profiler  
i Daedalus Apex – overfladekalibrering,  
knapprogrammering, markørbevægelser  
og lys – ved hjælp af Logitech  
Gaming Software. Hent softwaren og læs  
hvordan du kan tilpasse Daedalus Apex,  
på [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## 6 programmerbare knapper

1. Venstre (knap 1)
2. Højre (knap 2)
3. Hjulknap (knap 3)
4. Tilbage (knap 4)
5. Fremad (knap 5)
6. Skift mellem følsomhedsindstillinger (knap G6)

### Standardindstillinger:

Dpi-værdier: 400/800/1600/3200

USB-rapporteringshastighed:  
1000/sek (1ms)

Logo-belysning: Til, med skiftende farver

Sidebelysning: Til, med skiftende farver

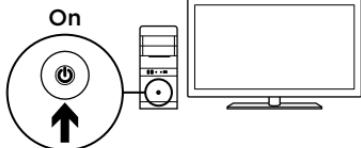

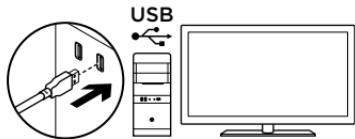

## Indbygget profil

Med Daedalus Apex kan du justere dine indstillinger indtil de er perfekte og gemme dem i den indbyggede hukommelse. Du kan tildele flere profiler og justere knapfunktioner, dpi-værdier, USB-rapporteringshastighed og lyseffekter med den valgfri Logitech Gaming Software der kan hentes på [www.logitech.com/  
support/g303](http://www.logitech.com/support/g303)

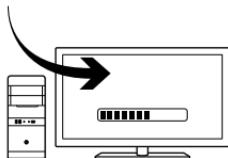

## Tip

Afprøv standardindstillingerne i nogle øvespil før du ændrer dem.

Logitech Gaming Software ændrer som standard musens indbyggede hukommelse. Erfarne spillere kan ved at vælge "Automatisk registrering af spil" på hjemmeskærmen tilpasse konfigurationen af knapperne og skifte følsomhed til hvert spil alt efter hvilke behov de har. Logitechs spillesoftware gemmer og anvender automatisk disse oplysninger når det pågældende spil registreres.

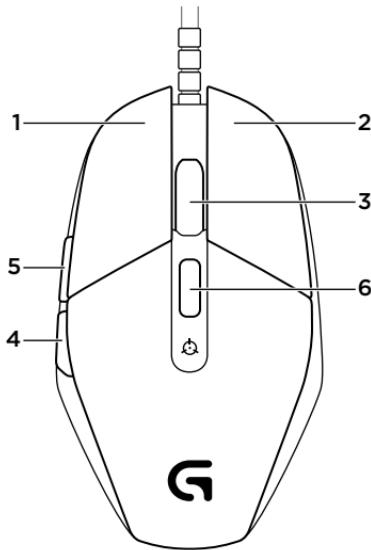

**1****2**

Daedalus Apex er klar for å spille spill.  
Hvis du vil tilpasse Daedalus Apex,  
ser du i neste del.

**3**

Du kan tilpasse innebygde profiler for  
Daedalus Apex – overflatejustering,  
knappeprogrammering,  
sporingsatferd og belysning – med  
Logitech Gaming Software. Gå til  
[www.logitech.com/support/g303](http://www.logitech.com/support/g303) for å  
laste ned denne programvaren og finne ut  
hvordan du tilpasser Daedalus Apex.

## 6 programmerbare knapper

1. Venstre (knapp 1)
2. Høyre (knapp 2)
3. Hjulklikk (knapp 3)
4. Tilbake (knapp 4)
5. Fram (knapp 5)
6. Bla gjennom ppt (Knapp G6)

### Standardinnstillinger:

Ppt-verdier: 400/800/1600/3200

Usb-rapporteringshastighet:  
1000 per sekund (1 ms)

Logobelysning: På, med fargesyklisk effekt

Sidebelysning: På, med fargesyklisk effekt

## Innebygd profil

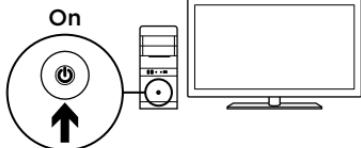

Med Daedalus Apex kan du tilpasse innstillingene og deretter lagre dem i det innebygde minnet. Du kan tilordne justeringsknappfunksjoner, DPI-verdier, usb-rapportsatser og lysfarger og -effekter til flere profiler med å bruke det valgfrie Logitech Gaming Software, tilgjengelig for nedlasting fra [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## Tips

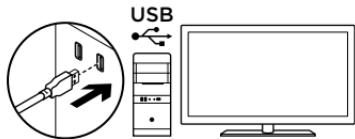

Gjør deg kjent med profilinnstillingene ved å spille litt med dem før du eventuelt endrer dem.

Logitech Gaming Software endrer det innebygde minnet på musen som standard. Viderekommande spillere kan konfigurere hvert spill etter deres spesifikke knappekonfigurasjon og behov for sensitivitetsbytte, ved å velge Automatisk oppdagelse av spill fra hjemvisningen. Denne informasjonen lagres i Logitech Gaming Software, og tas automatisk i bruk hver gang den registrerer at du bruker spillet.

1

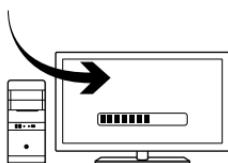

2

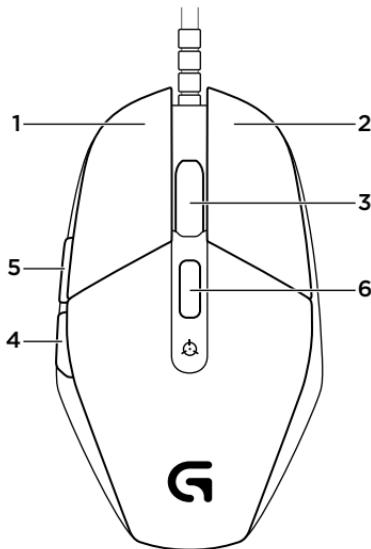

Daedalus Apex on valmiina peliin.  
Jos haluat mukauttaa Daedalus Apex -hiiresi toimintoja, katso lisätietoja seuraavasta osiosta.

3

Logitech Gaming Software -ohjelmiston avulla voit mukauttaa Daedalus Apexin toimintaprofiileja (alustaoptimoinnin, painikkeiden ohjelmoinnin, seurantaominaisuudet ja valaistuksen). Lataa ohjelmisto ja lue Daedalus Apexin mukauttamisohjeet osoitteesta [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## 6 täysin ohjelmoitavaa painiketta

1. ykköspainike (painike 1)
2. kakkospainike (painike 2)
3. pyörän napsautus (painike 3)
4. takaisin (painike 4)
5. eteenpäin (painike 5)
6. DPI-asetuksen vaihto (painike G6)

### Oletusasetukset:

DPI-arvot: 400, 800, 1600, 3200

USB-päivitysnopeus:

1 000 kertaa sekunnissa (1ms)

Logovalaistus:

käytössä, värinvaihtumistehoste

Sivuvalaistus:

käytössä, värinvaihtumistehoste

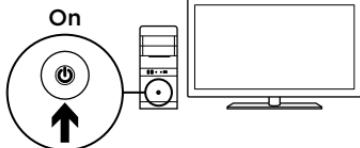

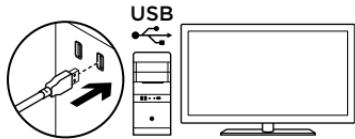

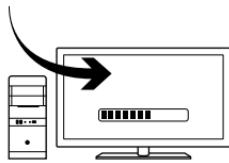

## Hiiren oma profiili

Daedalus Apexn asetuksia voi hienosäättää juuri omiin tarpeisiin sopiviksi, ja ne voi sitten tallentaa hiiren omaan muistiin. Logitech Gaming Software -ohjelmistossa voi määrittää useita profiileja ja säättää haluttaessa painiketoimintoja, DPI-arvoja, USB-päivitysnopeutta ja valaistustehosteita. Ohjelmiston voi ladata osoitteesta [www.logitech.com/  
support/g303](http://www.logitech.com/support/g303)

## Vihjeitä

Kokeile oletusprofiiliasetuksia harjoituspeleissä, ennen kuin muutat asetuksia.

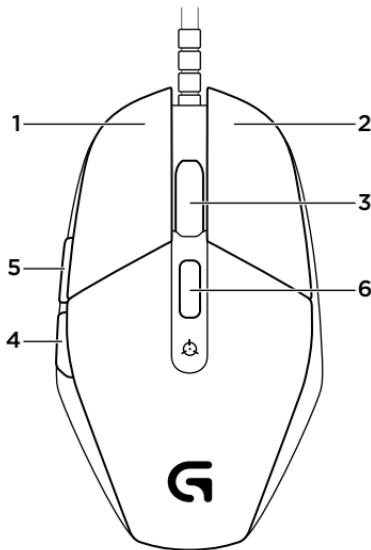

Oletusarvoisesti Logitech Gaming Software muuttaa hiiren omaa muistia. Peliharrastajat voivat mukauttaa hiiren kuhunkin peliin sopivaksi haluamiensa painikemääritysten ja tarkkuudenvaihtotarpeidensa mukaan valitsemalla aloitusnäkymästä automaattisen pelintunnistuksen. Logitech Gaming Software tallentaa tiedot ja ottaa ne automaattisesti käyttöön, kun peli tunnistetaan.

**1****2****3**

To Daedalus Apex είναι έτοιμο για παιχνίδι.  
Αν θέλετε να προσαρμόσετε το Daedalus Apex, ανατρέξτε στην επόμενη ενότητα.

Μπορείτε να προσαρμόσετε  
τα ενσωματωμένα προφίλ του  
Daedalus Apex (ρύθμιση επιφάνειας,  
προγραμματισμός κουμπιών, συμπεριφορά  
παρακολούθησης και φωτισμός),  
χρησιμοποιώντας το λογισμικό Logitech  
Gaming Software. Πραγματοποιήστε  
λήψη αυτού του λογισμικού και μάθετε  
πώς μπορείτε να προσαρμόσετε  
το Daedalus Apex στη διεύθυνση  
[www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## 6 πλήρως προγραμματιζόμενα κουμπιά

1. Αριστερό (κουμπί 1)
2. Δεξιό (κουμπί 2)
3. Πάτημα τροχού (κουμπί 3)
4. Πίσω (κουμπί 4)
5. Εμπρός (κουμπί 5)
6. Κύκλος DPI (κουμπί G6)

### Προεπιλεγμένες ρυθμίσεις:

Τιμές DPI: 400/800/1600/3200

Ταχύτητα απόκρισης USB:  
1000/δευτερόλεπτο (1 ms)

Φωτισμός λογότυπου:  
Ενεργός, με εφέ εναλλαγής χρωμάτων

Πλευρικός φωτισμός:  
Ενεργός, με εφέ εναλλαγής χρωμάτων

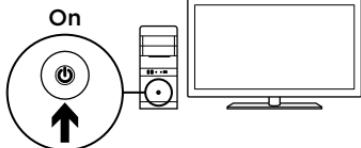

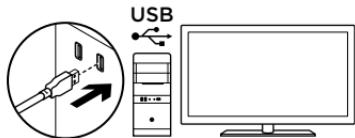

## Ενσωματωμένο προφίλ

Το Daedalus Apex σάς επιτρέπει να προσαρμόζετε τις ρυθμίσεις μέχρι να βρείτε τις ιδανικές και να τις αποθηκεύετε στην ενσωματωμένη μνήμη. Μπορείτε να αντιστοιχίσετε πολλά προφίλ και να προσαρμόσετε τις λειτουργίες των κουμπιών, τις τιμές DPI, την ταχύτητα απόκρισης USB και τα χρώματα και τα εφέ φωτισμού, χρησιμοποιώντας το προαιρετικό λογισμικό Logitech Gaming Software, διαθέσιμο για λήψη από τη διεύθυνση [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## Συμβουλές

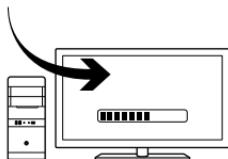

Δοκιμάστε τις προεπιλεγμένες ρυθμίσεις προφίλ σε παιχνίδια εξάσκησης πριν αλλάξετε τις ρυθμίσεις.

Από προεπιλογή, το λογισμικό Logitech Gaming Software αλλάζει την ενσωματωμένη μνήμη του ποντικιού. Επιλέγοντας τη δυνατότητα «Αυτόματος εντοπισμός παιχνιδιού» από την αρχική προβολή, οι έμπειροι παίκτες μπορούν να προσαρμόζουν κάθε παιχνίδι με βάση τις συγκεκριμένες ανάγκες τους για τη ρύθμιση κουμπιών και την αλαγή της ευαισθησίας. Το λογισμικό Logitech Gaming Software αποθηκεύει αυτές τις πληροφορίες και τις εφαρμόζει αυτόματα μόλις εντοπίσει το παιχνίδι.

**1****2**

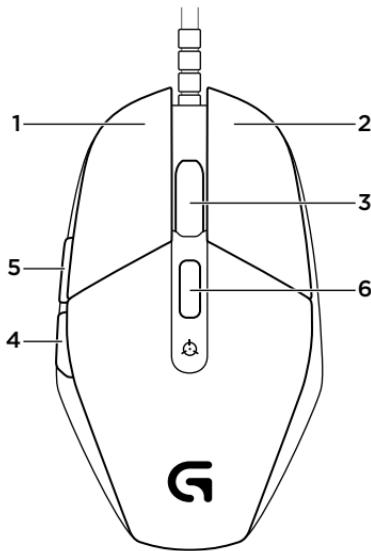

Daedalus Apex'ınız oyuna hazır.

Daedalus Apex'ınızı kişiselleştirmek istiyorsanız, bir sonraki bölüme göz atın.

**3**

Logitech Gaming Software'i kullanarak Daedalus Apex'in yerleşik profillerini yüzey uyarlama, düğme programlama, davranış izleme ve aydınlatma ile kişiselleştirebilirsiniz. Bu yazılımı [www.logitech.com/support/g303](http://www.logitech.com/support/g303) adresinden indirin ve Daedalus Apex'ı nasıl kişiselleştirebileceğinizi öğrenin

## 6 adet tamamen programlanabilir düğme

1. Sol (Düğme 1)
2. Sağ (Düğme 2)
3. Tekerlek tıklatma (Düğme 3)
4. Geri (Düğme 4)
5. İleri (Düğme 5)
6. DPI döngüsü (Düğme G6)

### Varsayılan Ayarlar:

DPI Değerleri: 400/800/1600/3200

USB Rapor Hızı: 1000/sn (1 ms)

Logo aydınlatma: Açık, renk döngüsü efektli

Yan aydınlatma: Açık, renk döngüsü efektli

## Yerleşik profil

Daedalus Apex ayarlarınızı mükemmel olana dek değiştirmenizi ve yerleşik belleğinde depolamanızı sağlar.

**[www.logitech.com/support/g303](http://www.logitech.com/support/g303)**

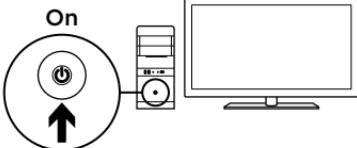

adresinden indirilebilen isteğe bağlı Logitech Gaming Software'ı kullanarak birden fazla profil atayabilir ve düğme fonksiyonlarını, DPI değerlerini, USB rapor hızını ve aydınlatma renkleri ile efektlerini ayarlayabilirsiniz

## İpuçları

Bu ayarları değiştirmeden önce pratik yapabileceğiniz oyunlarla varsayılan profil ayarlarını deneyin.

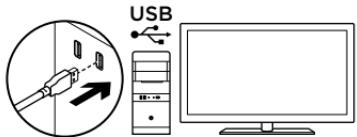

Logitech Gaming Software varsayılan olarak mouse'un yerleşik belleğini değiştirir. İleri seviye oyuncular, ana görünümden "Otomatik Oyun Algılama"yı seçerek, her oyunu özel düğme ayarı ve hassas düğme değiştirme ihtiyaçlarına göre kişiselleştirilebilirler. Logitech Gaming Software, bu bilgileri depolar ve oyun algılandığı zaman otomatik olarak uygular.

1

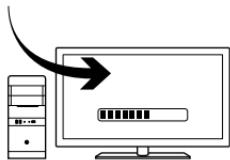

جاهز لتشغيل الألعاب. إذا كنت ترغب في إضفاء سمات شخصية على Daedalus Apex، فراجع القسم التالي.

إضاءة الجانبين: تشغيل - مع تأثير دوران ملون

## ملف التعريف المدمج

يسمح لك Daedalus Apex بإدخال التعديلات النهائية على الإعدادات لديك حتى تصبح مثالية كما يتيح لك تخزينها في ذكرته المدمجة. يمكنك تعين ملفات تعريف متعددة وتعديل وظائف الأزرار وقيم DPI ومعدل تقرير USB وتأثيرات الإضاءة باستخدام البرنامج الاختباري، المتاح تنزيله من [www.logitech.com/support/g303](http://www.logitech.com/support/g303)

## تمييز

يمكنك تجريب الإعدادات الافتراضية لملف التعريف في الألعاب التجريبية قبل تغيير هذه الإعدادات.

في الوضع الافتراضي، يغير البرنامج Logitech Gaming Software (الذاكرة المدمجة للماوس) "Automatic Game Detection" عن طريق تحديد "Automatic Game Detection" (الاكتشاف التلقائي للعبة) من العرض الرئيسي، يستطيع اللاعبون المترسّرون تخصيص كل لعبة بحسب احتياجات تبديل مستوى الحساسية والتهيئة الخاصة بالأزرار. حيث يقوم البرنامج Logitech Gaming Software بحفظ هذه المعلومات وتطبيقها تلقائياً عند اكتشاف اللعبة.
