Video

- **Starting the video:** The video is controlled by the application and will start once the camera is selected and the video is started in the application. An LED will light when the video is streaming.
- **Pan and tilt** the camera using the controls on the remote control. Press once for incremental or press and hold for continuous pan or tilt. Caution: Do not manually rotate webcam head. Doing so may damage unit.
- **Zoom** the camera up to 10X by pressing the zoom button.
- **Camera Preset:** If you wish the camera to return to your own defined “home” position when reconnected to the PC, first select the position and then press and hold the Camera Preset button for 3 seconds. You may also return to your defined home position at any time by pressing the Camera Preset button once.
- **Far end control:** By selecting this key and downloading the application from www.logitech.com/support/cc3000e, you may control the pan, tilt and zoom of a remote ConferenceCam CC3000e or a ConferenceCam BCC950 in supported applications. Camera selection and pan, tilt and zoom tools are also available from the downloadable application for PC as well as ability to disable this feature locally. Please visit the download page listed for more information.
