Privacy shade

Detachable cable  
(USB 2.0 or 3.0) Type C compatible

Carrying case

# REFERENCE GUIDE

## Logitech BRIO

### 1 SET UP

Set up camera on an LCD or on a tripod.

### 2 CONNECT

Connect cable to the camera and a computer. Please give the camera a few seconds to enumerate in the operating system.

Note: IR and 4K are better achieved with USB 3.0

### 3 GO

Start your video or audio call from your application. The LEDs on the camera will light when streaming.

### WINDOWS HELLO

Your camera is certified for Windows® Hello™ to use facial recognition login for Windows 10.

Note: The camera will also work with other facial recognition software for both Windows and Mac®. Please visit our support website for more details.

The camera and IR sensor/LED supports this feature plug-and-play, following setup in Windows 10. Just look at the camera and the system will log you in.

Note: The IR sensor supports a more reliable login. IR is more reliably supported with USB 3.0

### CAMERA SETTINGS APP

Logitech offers downloadable software for adjustable field of view, camera image settings, pan, tilt and zoom, and an integrated background replacement labs project, powered by Personify.
