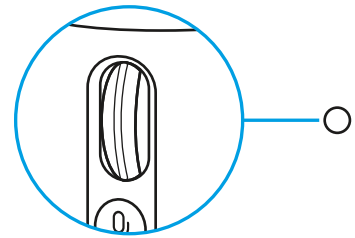
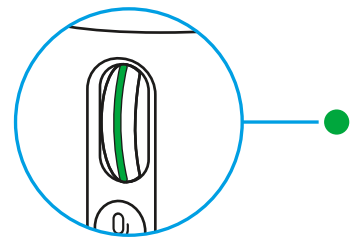
The LED on the scroll wheel also indicates if the mic is being used.

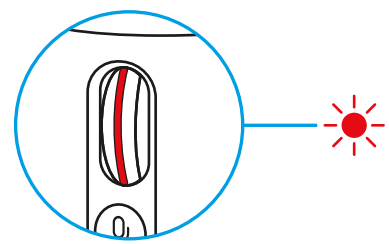
- Solid white means your mic is powered on.



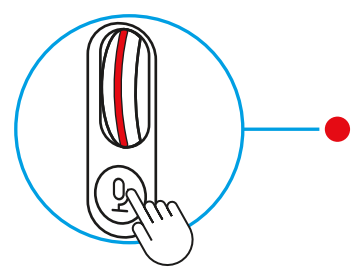
- Solid green means your mic is actively delivering audio.



- Flashing red means your gain level is too high and causing clipping or distortion so it's best to turn it down.



- Solid red means your microphone is muted (press the mute button by the scroll wheel to mute or unmute.



SETUP 6

After you are happy with the gain setting,
click the wheel in to enable Smart Audio Lock.
The LED on the wheel will turn Cyan when enabled.

Smart Audio Lock: smartly adjusts your gain by using an analog limiter to prevent clipping and a downward expander to reduce ambient background noise.

When enabled, the scroll wheel will not change gain.
