

Logitech and Zoom Audio Solutions Guide for Government

Purpose-built for public service

Modern government demands communication tools that are as secure as they are simple. Logitech and Zoom have partnered to deliver easy-to-deploy solutions designed to modernize legacy operations, improve workplace experiences, and secure citizen-facing services.

Whether coordinating from a federal office, a municipal department, or a secure facility, Logitech and Zoom provide the reliability and clarity required for mission-critical public service.

H390 USB HEADSET

A dependable headset for public-sector teams that need TAA compliance and compatibility with Zoom, the Logitech H390 offers the perfect blend of plug-and-play simplicity and reliable daily performance for state, local, and federal workspaces.

- Enhanced digital audio
- Noise-canceling microphone
- Convenient in-line controls
- Designed for all-day comfort
- TAA P/N: 981-001789

Logitech H390 is a strong fit for agencies prioritizing compliant purchasing and everyday collaboration. For teams looking for additional premium headset options certified for Zoom, explore the broader Logitech portfolio on the next page.

More ways to support every conversation

In addition to H390, Logitech offers a portfolio of headsets certified for Zoom to support a range of environments and needs.

When communication is mission-critical, there is no room for connection issues. Our premium portfolio of Zoom-certified headsets is designed to work seamlessly with Zoom Workplace and Zoom Contact Center right out of the box. With advanced active noise cancellation, AI-powered audio, and ergonomic designs, these headsets help government professionals stay focused on the mission at hand.
