# Logitech Reach

## Adjustable content camera for dynamic presentations and demonstrations

Logitech Reach changes how professionals share physical content, making presentations more engaging and innovative for both in-person and remote teams. Its versatile pivoting camera head and easy one-handed sliding controls make it simple to display objects and materials accurately.

**logitech®**

### **Collaborate seamlessly by showcasing objects from every angle**

The Reach camera revolutionizes collaboration by enabling teams to explore objects from unique vantage points, making it an essential tool for showcasing products, samples, models and artifacts during presentations or discussions.

### **Intuitive, fluid movement for dynamic demonstrations**

Reach features intuitive pan, tilt, and zoom controls with vertical and horizontal sliders, along with a pivoting camera, enabling presenters to deliver engaging and dynamic presentations showcasing physical content beyond just documents.

### **Effortless camera alignment for clearer engagement with content**

The yellow dot indicator and grip ring on the pivoting camera ensures constant awareness and control of the camera's orientation so that presenters can keep the content level from their point of view making the demonstration easier to follow.

### **Portable and versatile to fit any space**

To accommodate the dynamic needs of hybrid employees, choose between two versatile mounting options: a stable surface base for flexible desk placement and an edge clamp ideal for tight workspaces. Both bases are available for purchase as accessories, allowing seamless transitions between setups with a single camera.

### **Seamless compatibility and easy plug and play setup**

Logitech Reach offers a plug and play experience over USB without additional or proprietary software to download or install. It's compatible with most computers, including iPads and Chromebooks, that use USB as well as camera apps, conferencing or streaming platforms. You can even utilize it along with your favorite AI tools to create a seamless view of your stream.

### **Exceptional video quality and two distinct presentation modes**

With Logitech StreamCam at its core, Reach delivers 1080p/60fps video quality enhanced by glass optics and smart autofocus, ensuring sharp, detailed visuals of even the finest details. Its innovative articulating arms provide two versatile modes: desktop mode for seamless content exploration and capture, and stowed mode for presenter view or compact storage.
