

logitech®

Learning powered by Logitech + Apple

Connect devices, spaces, and experiences with
Logitech solutions built for Apple environments.

Apple and Logitech together create a simpler foundation for
modern higher education.

Capture in real time

Support live teaching, lecture capture
& catch-up

Demonstrate clearly

Flexible ways to show objects,
sketches, tools & techniques

Immerse learners

Practice skills, visualize
concepts & build confidence

Classroom education

Create seamless, Apple-powered classrooms that support hybrid teaching and intuitive control.

Content sharing

- **Scribe** - A camera that effortlessly captures and shares whiteboard content to iPad or MacBook for in-room and remote learners
- **Reach** - A content camera offering stunning views of hands-on demos, annotations, and physical materials on Apple devices

Lecture capture

- **Rally Camera Streamline Kit** - An intuitive, control-based room PTZ camera with easy placement and mounting
- **Rally Camera AI Pro** - An intelligent, AI-powered camera with intuitive controls & RightSight 2 Presenter Tracking

Hybrid student participation

- **Rally Board 65** - An all-in-one collaboration display on a mobile cart for hybrid participation anywhere

Class student capture (BYOD)

- **Rally Camera Streamline Kit** - A camera system showing the whole room on Apple devices with one-touch preset view switching

Lab education

Enable hands-on, interactive learning with flexible tools that bring demonstrations to life.

Lab lesson enablement

- **Rally Board 65** - An easy solution to bring remote students straight into procedures and experiments
- **Spotlight** - An advanced presentation remote offering complete control for in-person, virtual, or hybrid settings

Demonstrations

- **Combo Touch for iPad Air** - A snug, protective keyboard case that lets you move freely, annotate in real time, and stay focused on lectures
- **Reach** - A flexible content camera for presenting how-tos, prototypes, or creative work with flair

Lesson creation

Give educators everything they need to capture, produce, and share high-quality content.

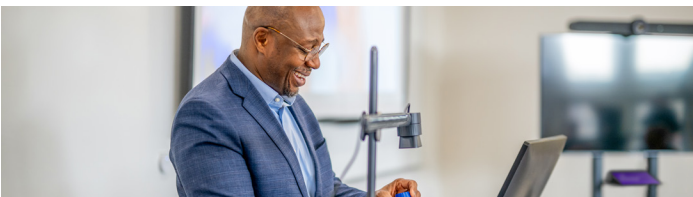

Desktop compute & input

- **MX Keys Mini Combo** - A compact keyboard and mouse designed for efficient content creation and streamlined workflows on Apple devices
- **MX Creative Console** - A customizable control surface for shortcuts, macros, and precise creative control

Portable compute

- **Combo Touch for iPad Air** - A mobile lesson creation station with four use modes and detachable keyboard
- **Logi Mevo Studio App** - A powerful production software tool for easy streaming and multi-camera control from a single device

Desktop AV capture

- **Brio 505** - A full-HD webcam with auto light correction and noise-reducing mics
- **Litra Glow** - A TrueSoft lighting solution that enhances on-camera presence
- **Reach** - A content camera ideal for capturing step-by-step procedures and lecture content

Portable AV capture

- **Mevo Start** - A portable 1080p streaming camera with wireless flexibility and long battery life
- **Mevo Core** - An advanced 4K camera with interchangeable lenses for production-level video capture

Remote learning

Take high-quality learning experiences beyond campus with reliable, easy-to-use solutions.

Input & navigation

- **MK120 Combo** - A simple, durable wired keyboard and mouse for dependable everyday use with Apple devices
- **MK625 Combo** - A mouse and keyboard combo designed for comfort, productivity, and USB-C connectivity on iPad or MacBook

Video

- **Brio 305** - A full HD webcam with auto light correction, noise-reducing mic, and USB-C connectivity with Apple devices

XR learning

Enable students to explore, practice, and understand in all-new ways.

Apple 3D input & interactivity

- **Muse (for Apple Vision Pro)** - A spatial input device that enables intuitive creation and interaction in immersive learning scenarios

Group learning

Turn shared spaces into connected collaboration hubs where students can create and share ideas.

Video collaboration & control

- **Rally Bar Huddle** - A compact all-in-one video bar designed for small spaces
- **Rally Bar Mini** - A powerful, space-saving video bar enabling VC in mid-sized classrooms
- **Rally Bar** - An enterprise-grade, all-in-one solution for larger classrooms
- **Rally Plus** - A modular AV system for large or complex rooms, offering flexible mic and speaker configurations for full-room coverage
- **Tap IP** - A network-connected touch controller to simplify starting and managing meetings
