

Modernizing Content Sharing:

A guide for higher education

Logitech in higher education

For over 40 years, Logitech has been developing tools that deliver new levels of productivity, connection, and collaboration. Our solutions support a connected ecosystem of modern teaching, learning, and working environments.

Higher education environments have evolved into multifaceted learning spaces where students can attend, participate, and collaborate in-person, remotely, or through a combination of both. To support hybrid learning experiences, tech for modern content sharing needs to include solutions for physical, digital, whiteboard, chalkboard, and any other methods.

Connection & collaboration: More than two-thirds of university students (69%) prefer fully online, hybrid, or blended learning options. No matter the work or learning space, make connecting easier and more efficient with ready-to-go solutions that aid conversation and collaboration beyond the classroom.¹

Tech that just works: Engineered for simplicity and durability, Logitech offers reliable tools for seamless and effective work, study, and research experiences.

Immersion & engagement: Empower educators to engage and maintain the focus of remote and in-class students with specialized, intuitive tools to share demonstrations, content, and techniques in impactful, dynamic ways.

Tools for modern content sharing

Scribe

An AI-powered whiteboard camera that easily captures and shares whiteboard content, allowing in-class and remote students to actively engage with their instructor and peers.

Spotlight 2

Offers advanced digital highlighting—spotlight, squarelight, magnify, and annotation—enabling educators to focus attention and keep in-person, virtual, or hybrid audiences engaged.

Rally Camera Streamline Kit

A comprehensive camera system for hyflex teaching and presentations in large spaces with one-touch preset view switching to show the whole room.

Reach

An intuitive camera—with one-hand flexibility and smooth vertical and horizontal controls—enables educators to seamlessly present physical content, supporting effective collaboration, exploration, and engagement for in-class and remote students.

Simplified IT management

Logitech services help remove barriers to collaboration, optimize performance, and get the most out of technology investments. Enterprise-grade security, device coverage, and global support give IT managers peace of mind and to decrease tech issues. Easily manage video collaboration devices using Logitech Sync, a cloud-based platform to monitor room health, deploy updates, and modify settings.
