Carl Remigius Fresenius Education Group

Overview

Carl Remigius Fresenius Education Group has shaped individuals through meaningful education for more than 175 years. With over 60 locations around the globe, the institution emphasizes equipping future generations with the skills needed to tackle tomorrow's challenges. The credo of the group is: "Next Generation Education."

Among its campuses, the university's Munich location stands out as a hub for interdisciplinary exchange. Students and young entrepreneurs thrive in a networked community that fosters innovation and career opportunities. All campuses are committed to digital transformation, and it aims to create environments that enable modern teaching, seamless collaboration, and equal participation, whether in-person or remote.

To achieve digital transformation, Carl Remigius Fresenius Education Group has teamed up with Logitech to implement advanced digital communication solutions tailored for modern hybrid learning and collaboration. They have selected tools for cross-faculty collaboration as well as individual productivity and mobility. The Munich campus, which embeds five educational institutions of the group, the Hochschulen Fresenius, AMD, Charlotte Fresenius University, Carl Remigius Medical School as well as the Pioneer Lab, the internal entrepreneurial incubator, has selected Logitech Rally Bar Huddle, Logitech Sight, Logitech Tap IP, Logitech Signature Slim MK 950, Logitech Zone Wireless 2, Logitech Combo Touch, and Logitech Crayon as key tools to digitally connect its faculties and drive productivity for its staff, whether they are on-campus, at home, or on the go.

Challenge

The Munich campus, as a key driver of educational innovation and digital transformation, is on a mission to fully realize the promise of hybrid working. To achieve this goal, they were looking for modern ways to connect their faculty and offer more flexibility for professors and administration in order to update their aging technology infrastructure. These challenges reflect the university's drive to remain forward-thinking by offering an inclusive, innovative, and competitive educational environment. Their search for a comprehensive solution has led them to Logitech.

"Logitech products offer the perfect blend of usability, simplicity, and timeless design.

Our faculty and administrative staff are always looking for ways to improve how they communicate, collaborate, and create—the Logitech solution has helped us streamline how we live and work."

Solution

The Munich campus preferred to work with a single vendor for their collaboration needs, as well as for productivity and mobility solutions for individuals, including faculty and staff. Logitech became a natural choice given the broad range of products that help people connect, create, work, learn, and play.

1

Functionality

The team at the Munich campus sought solutions that offered robust functionality without being overly complex. They wanted devices that worked with their existing applications while also protecting investments in future technologies.

2

Ease of Use

The local team recognized that tech solutions are only effective when people feel comfortable using them. Plug-and-play simplicity was a critical factor in deciding which tools to implement for both intercampus collaboration and personal productivity.

3

Sustainability

Sustainability is a central part of German policy and society and is considered important for most organizations when making purchase decisions. Logitech's longstanding commitment to sustainability played an important role in the purchasing decision.

Team Collaboration Solutions

Logitech Rally Bar Huddle, an all-in-one video bar designed for small meeting rooms to deliver sharp AI-enhanced video, noise suppression, and crystal-clear sound in hybrid meetings, providing a natural and professional conferencing experience.

Logitech Sight, a tabletop collaboration solution, uses intelligent multi-participant framing called Smart Switching. This camera enhances equity in hybrid meetings by delivering a complete room view and clear audio, ensuring remote students and faculty members feel as present as their on-site colleagues.

Logitech Tap IP touch controller integrates seamlessly with Logitech's video conferencing solutions, enabling one-touch meeting join and simple meeting room management for users.

Personal Productivity Tools

Logitech Signature Slim Combo MK 950 is a comfortable, ergonomically designed, and efficient keyboard and mouse combo, ideal for use in co-working spaces. It enhances productivity for faculty and staff when in the office.

Logitech Zone Wireless 2 is a wireless headset that provides superior sound quality, active noise cancellation, and all-day comfort for focused work in high-traffic or noisy environments, helping to keep faculty and staff engaged wherever they're working from.

Logitech Combo Touch and Logitech Crayon offer a versatile iPad keyboard case and stylus combo that enables faculty and staff to work efficiently from mobile locations—perfect for those needing to combine creativity and productivity on the go.

"Logitech solutions offer a familiar and intuitive interface that we can take advantage of no matter where we're working. Whether we're on a video call with colleagues, cross-regional cooperation or simply working on forecasts and budget planning sheets, **Logitech products make it easy for us to be collaborative and productive.**"

Results

The Munich campus found that the Logitech team collaboration solutions helped increase the quality of hybrid working and team collaboration by enabling real-time, seamless connection. Students experience improved access and quality to faculty members through virtual consultation. The video solutions also helped foster a sense of community among internal and external stakeholders. From an IT perspective, Logitech's solutions provided ease of installation and management, fostering a frictionless experience for the IT team while ensuring a future-proof infrastructure.

The personal productivity tools help faculty members and administration stay focused, comfortable, and confident in their ability to work productively. This forward-thinking approach ensures Carl Remigius Fresenius Education Group remains an innovation leader in higher education. By combining tradition with cutting-edge technology, it affirms its vision of "Next Generation Education," empowering professors, students and administrative staff to meet the demands of tomorrow's world.
