Logitech B100
Wired Mouse for Education
Putting control in the palm of students’ hands

THE VALUE OF EASY NAVIGATION

Students should be able to focus on their work, not their technology equipment. The simple addition of a mouse to a Chromebook or laptop can make all the difference in a student’s everyday world by offering them a choice in how to work. A mouse may enable more effective navigation of long web pages or detailed learning apps. The result?

Simplicity and control that builds confidence and supports happy learners.

### WHY IT MATTERS

For students with still-developing motor skills, a mouse may be easier to use effectively than a trackpad for some tasks.

Helping students work more efficiently builds their confidence and supports better engagement in learning.

Students feel more confident when frustrations due to hard-to-use tools are removed as they may attribute the inability to work efficiently to be a reflection on them vs the technology.

Using a mouse supports students’ current and long-term health by allowing them to work in a more ergonomically friendly manner than a trackpad.
