

END-OF-LIFE RECYCLING DECLARATION

As a Responsible Producer, we monitor evolving recycling laws for Waste Electrical and Electronic Equipment (WEEE), packaging and batteries worldwide. A number of countries have recycling laws and infrastructure for our products, packaging and batteries and the number and scope of recycling laws continue to evolve and expand year-on-year. We proactively monitor and anticipate these developments.

All Logitech products comply with essential requirements of relevant WEEE regulations including requirements specified in the EU WEEE directive 2012/19/EU, as amended.

In countries where we have legal obligations, we carry out robust due diligence to identify Producer Responsibility Organisations as early as possible and we provide financial support to enable and support the development of effective recycling infrastructure and schemes. We also initiate voluntary schemes. Any recycling, for or on behalf of Logitech, must be carried out in accordance with our [Recycling Standard \(WWP-230351\)](#).

Logitech is a registered producer and participates in an Extended Producer Responsibility (EPR) compliance scheme in the following countries.

Country	Type	Scheme	Producer Registration No.	Public Register

In countries where our importers, distributors, retailers and other partners are responsible for recycling, we carry out due diligence exercises to understand legal obligations, communicate our expectations, and enforce good practice recycling as a contractual term of business.

We also recognize the need to raise awareness amongst consumers. We provide recycling information and labels on our product packaging, manuals and website, to raise consumer awareness of the importance of recycling and recycling options that are available to them. Our [Recycling Webpage](#) on logitech.com provides the most up-to-date information on recycling options for consumers, including our current and evolving voluntary recycling programs.

In addition to participating in the above EPR compliance schemes, Logitech has established the following voluntary recycling programs.

Country	Type	Scheme
Worldwide	Free mailback for end of life devices • 1 for 1 basis • Certain limitations apply	Learn more: • United States • Rest of World: Contact us: recycling@logitech.com
United States	Recycle and Save with Best Buy Logitech has partnered with Best Buy to offer consumers in the U.S. the opportunity to "Recycle and Save". Consumers can now drop off any brand of end-of-life mouse, keyboard, headset or webcam at their nearest Best Buy store, and receive a discount voucher, which can be used to purchase a Logitech or Logitech G device of the same category.	Learn more
	Recycle and Save with Staples & Logitech Logitech has partnered with Staples to offer consumers in the U.S. the opportunity to recycle via Staples' "Free Tech Take Back" program Consumers can now drop off certain brands of device at their nearest Staples store and receive a discount voucher, which can be used to purchase a Logitech device of the same category.	Learn more
	Free mailback with Logitech & MRM Logitech has partnered with MRM to raise consumer awareness of local recycling points in the U.S. and offer free mail-back, where local drop off points are not convenient for consumers.	Learn more
Hong Kong	Recycling for Social Impact Logitech has partnered with Vcycle to offer consumers in Hong Kong the opportunity to drop off any brand of computer peripheral to a Logitech-branded outlet store for free and responsible recycling. V Cycle is a social enterprise that offers decent work opportunities to the elderly and people in need.	Learn more
Singapore	Recycling at Challenger Stores Logitech has partnered with Challenger to finance the responsible recycling of end-of-life devices returned by consumers in Singapore.	Learn more
Taiwan	Information and free mailback Consumers in Taiwan can now find information on local recycling schemes or get in touch with Logitech to arrange free mailback of Logitech devices for responsible recycling.	Learn more
New Zealand	Recycle at TechCollect drop-off site Logitech has partnered with TechCollect to finance the creation of TechCollect drop-off sites in major population areas and empower consumers to drop off end-of-life devices for responsible recycling.	Learn more
China	Drop-off for free recycling Consumers can now drop off end-of-life devices for free and responsible recycling at any of our Logitech Outlet Stores in China.	Learn more

If any consumer or recycler requires further information on how to recycle electronic devices, please do not hesitate to contact recycling@logitech.com.
