

END-OF-LIFE STEWARDSHIP DECLARATION

As a Responsible Producer, we monitor evolving stewardship laws for Waste Electrical and Electronic Equipment (WEEE), packaging and batteries worldwide. A number of countries have stewardship laws and infrastructure for our products, packaging and batteries and the number and scope of stewardship laws continue to evolve and expand year-on-year. We proactively monitor and anticipate these developments.

In countries where we have legal obligations, we carry out robust due diligence to identify Producer Responsibility Organisations as early as possible and we provide financial support to enable and support the development of effective recycling infrastructure and schemes. We also initiate voluntary schemes. Any recycling, for or on behalf of Logitech, must be carried out in accordance with our [Recycling Standard \(WWP-230351\)](#).

Logitech is a registered producer in the following countries

Country	Type	Scheme	Producer Registration No.	Public Register
Brazil	WEEE and Packaging	GREEN Eletron	7123	LINK

	Batteries (Washington DC)	MRM	Not Applicable	DC Batteries LINK
	Batteries (country-wide)	Call2Recycle	Not Applicable	USA Batteries LINK

In countries where our importers, distributors, retailers and other partners are responsible for recycling, we carry out due diligence exercises to understand legal obligations, communicate our expectations, and enforce good practice stewardship as a contractual term of business.

We also recognize the need to raise awareness amongst consumers. We provide recycling information and labels on our product packaging, manuals and website, to raise consumer awareness of the importance of recycling and

recycling options that are available to them. Our [Recycling Webpage](#) on logitech.com provides the most up-to-date information on recycling options for consumers, including our current and evolving voluntary recycling programs.

If any consumer or recycler requires further information on how to recycle electronic devices, please do not hesitate to contact recycling@logitech.com.
