Workspace Guide
for Google Meet

The new workspace

In an enterprise landscape with in-office, hybrid, and remote workers, team collaboration is challenging. Logitech room solutions for Google Meet provide an enterprise-grade ecosystem of hardware, software, and services to simplify collaboration for your teams, regardless of location.

Our innovative solutions power meetings that put human connection at the center, providing a consistent experience across all spaces, while enabling simplified deployment, management, and maintenance for IT.

All these components come together seamlessly to enhance your Google Meet experience.

Modern workspace solutions

Everything you need to equip your team workspaces for productive collaboration.

logitech | ■ Google Meet

What sets us apart

Over 40 years of innovation

With a long history focused on collaborative solutions that increase productivity, Logitech is a trusted global brand you can depend on for design and innovation. Our video collaboration solutions work seamlessly with Google Meet to empower teams globally with simple, flexible, AI-driven tools that adapt to all the unique ways people work.
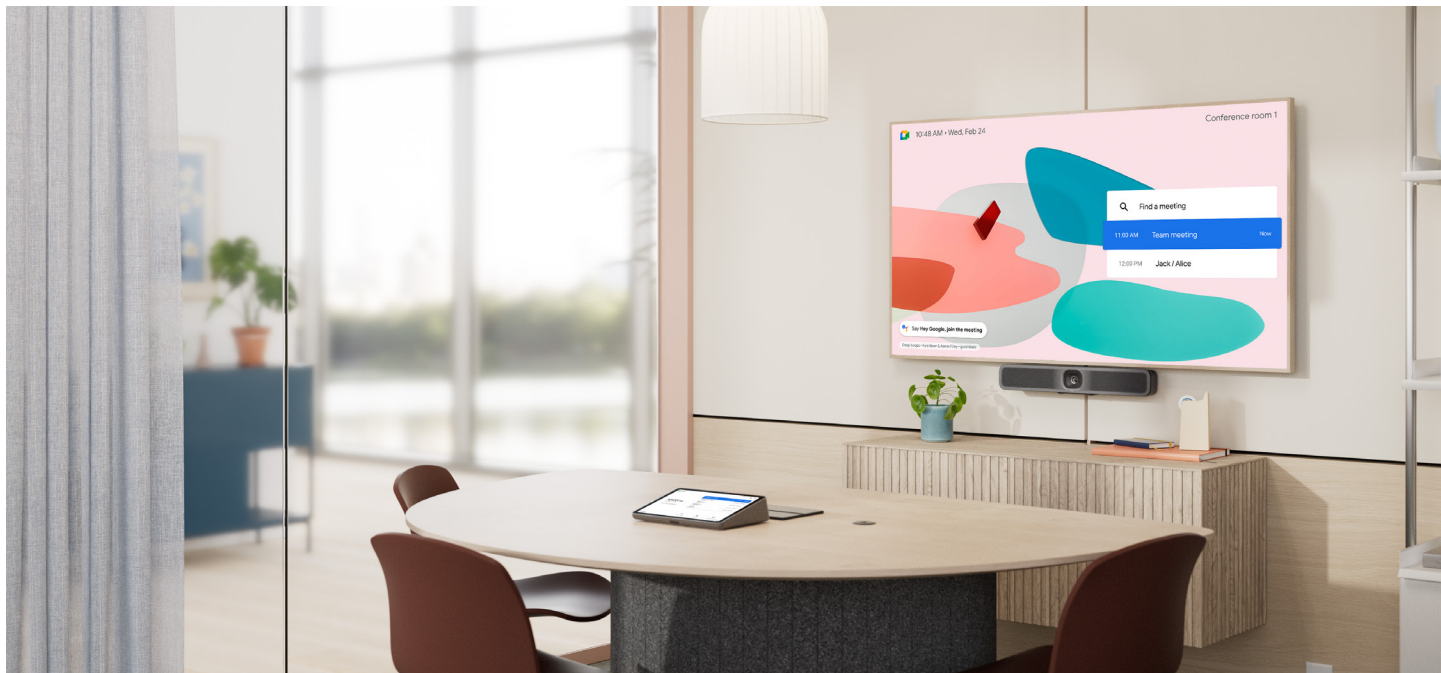

Global reach

Our footprint extends globally, including Logitech, Logi G, Streamlabs, and Ultimate Ears Pro.

- Availability in 100+ countries
- Global manufacturing and supply chain with a network of value-added resellers, system integrators, and other channel partners
- 14 local support sites around the world

Choice and flexibility

We enable rich collaboration through solutions that are easy to use and intuitive for users, while providing everyone the choice and flexibility to connect, create, and collaborate from anywhere.

- Range of solutions for every workspace, from phone booths to boardrooms
- Certified across platforms for Windows, ChromeOS, and Android, providing deployment flexibility
- Flexible design and configuration to meet the specific needs of any space
- Integration with Google Admin console, simplifying management and support

Designed for sustainability

Contribute to your company's sustainability goals with us. We are dedicated to reducing environmental impact with every design decision, from the moment raw materials are sourced to end-of-life considerations.

- All CollabOS devices are made with Next Life Plastics
- We use fabric made with recycled plastic materials whenever possible
- Our all-in-one video bars require fewer devices to operate as a room solution, and can draw less power compared to room systems with an external compute
- We deliver ongoing updates and additional capabilities via software, extending the life of every device

Hardware

Conference cameras and video bars

Logitech conference cameras and video bars are certified and optimized to work with with Google Meet and give you the flexibility to easily deploy meeting rooms with Google Meet on Android or Google Meet on ChromeOS. This allows you to create a more inclusive team workspace with high-quality video and audio that makes it feel like your whole team is in the room, even when half of them work from home.

Rally Bar

Logitech's premier, all-in-one video bar for medium and large rooms. Brilliant optics, powerful audio, and remarkable simplicity set a new standard for video collaboration.

Rally Bar Mini

Simplicity meets versatility with Rally Bar Mini, Logitech's advanced all-in-one video bar for small and medium rooms.

Rally Bar Huddle

Logitech's all-in-one video bar for huddle rooms and small meeting rooms. Rally Bar Huddle is designed to deliver equitable video conferencing meetings with ease.

Rally Plus

Power meets flexibility with Rally Plus, Logitech's video conferencing system for extra-large rooms. Rally Plus features an ultra- HD PTZ camera, modular audio, and AI-driven performance. Expandable up to seven mic pods for even greater coverage.

Rally Camera

Rally Camera is a USB camera that delivers brilliantly sharp video at resolutions up to 4K, perfect for medium to large meeting spaces. Rally can be used with third-party solutions or as a secondary camera in larger team workspaces and auditoriums.

MeetUp 2

Upgrade your small meeting rooms with MeetUp 2, an AI-powered USB conference camera for small spaces and huddle rooms that simplifies the meeting experience for employees and IT. Deploy with an in-room PC or in BYOD mode.

Sight

Working in tandem with Rally Bar or Rally Bar Mini, Sight extends coverage in larger rooms to give each remote participant a better front-and-center experience. By using Framing by Logitech in rooms with Google Meet hardware, Sight automatically identifies and frames speakers for a better remote experience.

Scribe

Effortlessly share whiteboards into Google Meet with Scribe, an AI-powered whiteboard camera. With built-in AI and a custom lens, Scribe broadcasts whiteboard content into video meetings with outstanding clarity.

logitech | Google Meet

Hardware

Meeting rooms: Touch controllers and compute

Deliver one-touch join, calendar integration, easy content-sharing, and a consistent experience across all rooms.

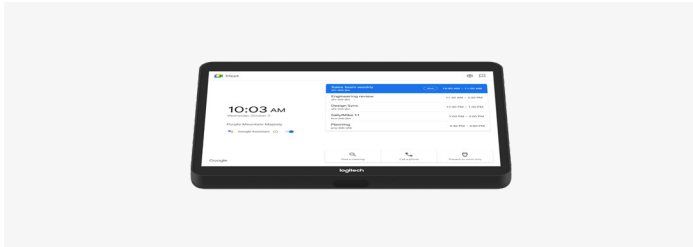

Tap IP

The Tap IP touch controller uses a single Power over Ethernet connection for one-touch join and easy content-sharing. Clean cabling and multiple mounting options ensure a professional install. Included with room solutions that use IP-connected touch controllers.
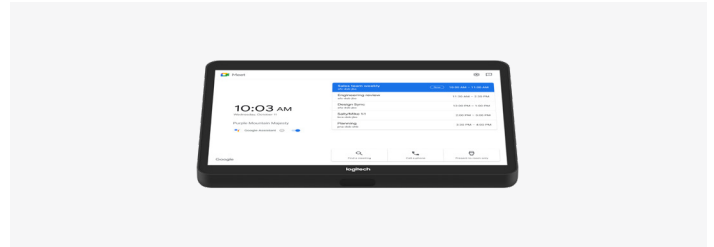

Tap

The Tap touch controller delivers one-touch join and easy content-sharing with clean cabling and multiple mounting options for a professional install. Included with room solutions that use USB-connected touch controllers.
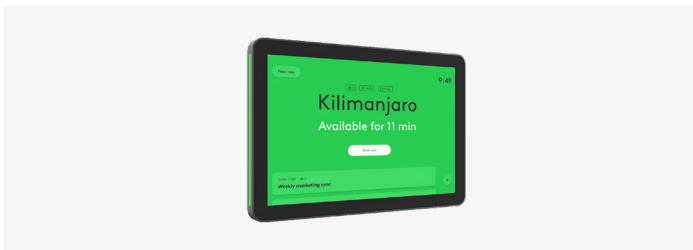

Tap Scheduler

This purpose-built scheduling panel for meeting spaces indicates availability and displays meeting details. Claim the space for ad hoc meetings, or schedule sessions. Cable management and included mounts allow for a professional install and fast deployment.

CTL Meet Compute

Use a Google-certified CTL Meet Compute to enable room solutions for Google Meet on ChromeOS.

Workstations: Desk booking

Enable personalized desk booking with a managed docking station.

Logi Dock Flex

Logi Dock Flex enables easy and personalized desk booking for employees and simple device management for IT.

Accessories

Accessories for conference cameras and video bars[1]

Accessories for Rally Bar, Rally Bar Mini, Rally, and MeetUp that offer modular flexibility, so you can equip any team workspace with the solutions to help make meetings more equitable.
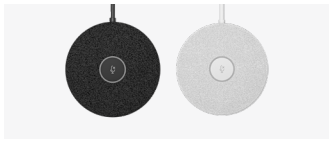

Rally Mic Pod
Modular microphones with RightSound for Rally Bar Mini, Rally Bar, and Rally.

Mic Pod Mount
Rally Mic Pod mount for tables and ceilings.

Mic Pod Pendant Mount
Rally Mic Pod Mount for rooms with tall ceilings.

Rally Mic Pod Hub
Customize mic placement for any conference table configuration.

Rally Mic Pod Extension Cable
10 m (32.8 ft) extension cable for Rally Mic Pod.

Rally Mic Pod CAT Coupler
Extend the length of Rally Mic Pod cables by connecting Rally Mic Pod CAT Coupler to a standard CAT cable.

Rally Speaker
Second speaker connects to Logitech Rally for clear, rich sound.
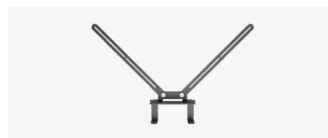

Wall Mount for Video Bars
VESA-compatible mounting kit for Rally Bar and Rally Bar Mini.

Rally Mount Kit
Custom mounts for a sleek installation and secure cabling.

TV Mount for Video Bars
Attach any Rally Bar to almost any display with VESA mounting points.

TV Mount for MeetUp
Mounting option for MeetUp and MeetUp 2.

Accessories for BYOD and content sharing

Enable BYOD meetings with simple, single-cable solutions—each designed for a different room setup.

Extend
BYOD connector optimized for Android-based and BYOD rooms.

Active USB Cable
BYOD connector for MeetUp 2 and Rally Board 65, ideal for huddle spaces and small rooms.

Swytch
BYOD connector optimized for PC-based rooms.

[1] All Logitech accessories listed on this page are compatible with Google Meet Rooms.

logitech | Google Meet

Accessories

Tap accessories

Simplify cable management and mount the Tap touch controller in the most convenient location.

Wall Mount for Tap

Space-saving wall mount with cable management for Tap and Tap room touch controllers.

Table Mount for Tap

Swiveling table mount with cable management for Tap and Tap IP touch controllers.

Riser Mount for Tap

Elevated table mount with swivel and cable management for Tap and Tap IP touch controllers.

CAT5e Kit for Tap

Cabling kit to supply USB data and power to Tap for cleaner and simpler cable routing. CAT5e Kit for Tap is now included in new shipments of Logitech Tap.

Tap Scheduler Angle Mount

Ideal for lower height placements or angled viewing. Adds 14-degree angle to the device's mounting bracket.

Scribe accessories

With these accessories, the Scribe whiteboard camera simplifies whiteboard sharing in any space.

Scribe Glass Mount

Mount Scribe on glass surfaces.

Polarizer for Scribe

Polarizing filter to reduce glare in environments with bright lighting.

logitech | Google Meet

Software

Unlock the full potential of your workforce and workspace with Logitech software solutions. From remote device and space management, to powering updates and integrations, to real-time data and actionable insights, our software helps IT save time and effort, enhances meeting experiences, and helps you get more out of your collaboration devices.
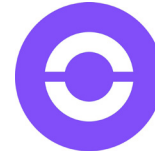

CollabOS

The unifying operating system running on select Logitech video collaboration devices, enabling device features and partner platform integrations.
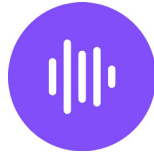

Sync

The remote workspace management software supporting video conferencing device management. Sync also provides device and room insights and management of room and desk booking.

Tune

The end-user software that shows personal device status and enables employees to customize select peripherals. Tune is also the interface for end-user desk booking.

Simplify device management

The integration between the Google Admin console and Logitech Sync simplifies management and support. IT managers can remotely manage devices through Logitech Sync, and they can configure, monitor, and update devices with greater control and visibility.

Manage spaces with ease

From meeting rooms to shared desks, you can simplify space management and enable employees to find and book rooms and desks for more engaging and collaborative days onsite.

Get more out of your devices

Watch your devices get smarter through regular updates that add advanced features, enable compatibility with Google Meet and unlock integration with other Logitech devices.

Proactively monitor the health of your devices

Sync provides real-time alerts and insights — for example, notifications about a camera offline or disconnected, firmware out of date, etc. — allowing teams to act before issues affect users. These alerts and insights help reduce downtime and ensure rooms stay ready for meetings, critical for Google Meet reliability.

logitech | Google Meet
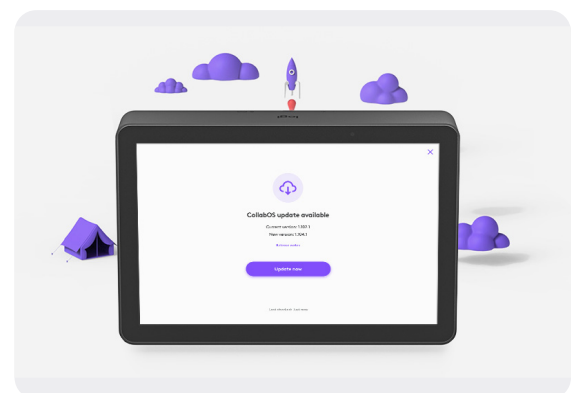

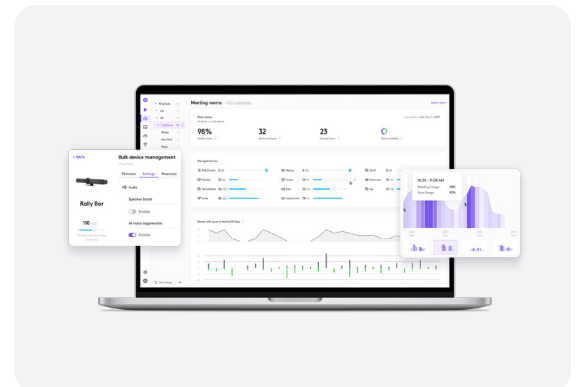

Software

Enhance AI capabilities for Google Meet with Logitech devices

From auto-framing to noise suppression, AI-powered devices from Logitech bring out the best of Google Meet intelligent meeting features — delivering collaboration experiences that are more equitable, productive, and seamless. Certified cameras and mics from Logitech ensure high-quality input that improves Google Meet features like real-time translated captions, auto-transcriptions, and Take Notes for Me.

RightSound + Google Meet noise cancellation

Logitech RightSound enhances audio processing with Google Meet by optimizing microphone pickup and suppressing background noise at the hardware level. RightSound ensures clearer audio, especially in challenging acoustic spaces, and pairs well with Google's own AI-driven audio improvements.

Logitech + Google AI video capabilities

AI-powered PTZ features and adaptive framing enhance Google Meet Dynamic Layouts — especially with multi-participant views and equity framing. These capabilities work seamlessly with Google Meet–certified hardware and align with the AI-driven visual layout automation from Google.

logitech | Google Meet

Services

Ensure your video collaboration solutions are always ready and operational when your teams need them. Logitech services help to increase uptime and reduce the burden on IT.

Logitech Select

Logitech Select is a comprehensive service plan that delivers reliability, continuity, and peace of mind for the enterprise. Rest easy knowing you have access to ultra-responsive 24/7 support, a designated Service Manager[1] for focused technical assistance, onsite spares[1] and accelerated RMAs for up to five years. Logitech Select also includes all premium software features of Logitech Sync, including Sync Remote UI Access and Insights.

Logitech Essential

Logitech Essential is a service plan that includes advanced software tools to help you manage your spaces and Logitech devices efficiently. Get access to all premium features of Logitech Sync, including insights on space and device usage; automated alerts for equipment failures through an integration with ServiceNow[2]; and comprehensive remove device management tools.

Extended Warranty

With an extended warranty,[3] your Logitech purchases are protected against defects for up to five years from the purchase date. Extended warranties are available for either one year or three years beyond the original Logitech manufacturer's limited two-year warranty.

[1] Available with purchase of a service plan for 50+ rooms.
[2] Requires ServiceNow license.
[3] Terms and conditions apply. Not available in all countries. Contact your reseller.

Workspace solutions from Logitech, certified by Google

To ensure a quality experience, Google recommends using only certified peripherals in meeting rooms. Logitech and Google jointly test their devices for quality, reliability, and interoperability. Logitech is proud to offer a complete portfolio of hardware certified for Google Meet and Google Voice.

What does Google Meet hardware certification provide?

Performance and quality

- A consistent user experience
- Performance audio and video quality with Google Meet services
- Automatic, over-the-air updates built into ChromeOS

Broad selection and rich feature set

- Certified solutions for every environment — from personal desks and focus rooms to large conference spaces
- Support for Google Meet AI features such as Dynamic Tiles, Dynamic Layouts, and live captions

Validated by third-party performance testing

- Rigorous performance testing to enable a quality product experience with Google Meet services

For the latest certification and compatibility information, see our Google Meet Certified Devices page.
