Module: Introduction

Page: Introduction

CC0.1
Introduction
Please give a general description and introduction to your organization.

Logitech is a world leader in products that connect people to the digital experiences they care about. Spanning multiple computing, communication and entertainment platforms, we develop and market innovative hardware and software products that enable or enhance digital navigation, music and video entertainment, gaming, social networking, and audio and video communication over the Internet.

Logitech has two operating segments, peripherals and video conferencing.

Our peripherals segment, which includes retail and OEM channels, encompasses the design, manufacturing and marketing of peripherals for PCs (personal computers), tablets and other digital platforms.

Our retail sales and marketing activities are organized into three geographic regions: Americas (including North and South America), EMEA (Europe, Middle East, Africa) and Asia Pacific (including, among other countries, China, Japan, Australia, Taiwan and India).

We sell our peripheral products to a network of distributors, retailers, and OEMs. Our worldwide retail network includes wholesale distributors, consumer electronics retailers, mass merchandisers, specialty electronics stores, computer and telecommunications stores, value-added resellers and online merchants. Our OEM customers include the majority of the world's largest PC manufacturers.

Our video conferencing segment encompasses the design, manufacturing and marketing of video conferencing products, infrastructure and services for the enterprise, public sector, and other business markets. Video conferencing products include scalable HD (high-definition) video communication endpoints, HD video conferencing systems with integrated monitors, video bridges and other infrastructure software and hardware to support large-scale video deployments, and services to support these products.

We sell our video conferencing products and services to distributors, value-added resellers, OEMs, and direct enterprise customers.

Since 1994, we have had our own manufacturing operations in Suzhou, China, which currently handles approximately half of our total production of peripheral products. We outsource the remaining production to contract manufacturers and original design manufacturers located in Asia. Our LifeSize video communications products are manufactured in Malaysia under contract with a third-party manufacturer.

In 2013 we extended our reporting boundary to include our leased facility in Suzhou which handles mostly SMT assembly for in-house produced products.

CC0.2
Reporting Year
Please state the start and end date of the year for which you are reporting data.

The current reporting year is the latest/most recent 12-month period for which data is reported. Enter the dates of this year first.

We request data for more than one reporting period for some emission accounting questions. Please provide data for the three years prior to the current reporting year if you have not provided this information before, or if this is the first time you have answered a CDP information request. (This does not apply if you have been offered and selected the option of answering the shorter questionnaire). If you are going to provide additional years of data, please give the dates of those reporting periods here. Work backwards from the most recent reporting year.

Please enter dates in following format: day(DD)/month(MM)/year(YYYY) (i.e. 31/01/2001).

Enter Periods that will be disclosed
Tue 01 Jan 2013 - Tue 31 Dec 2013

CC0.3
Country list configuration
Please select the countries for which you will be supplying data. If you are responding to the Electric Utilities module, this selection will be carried forward to assist you in completing your response.

Select country
China

CC0.4
Currency selection
Please select the currency in which you would like to submit your response. All financial information contained in the response should be in this currency.

USD($)

CC0.6
Modules
As part of the request for information on behalf of investors, electric utilities, companies with electric utility activities or assets, companies in the automobile or auto component manufacture sub-industries, companies in the oil and gas sub-industries, companies in the information technology and telecommunications sectors and companies in the food, beverage and tobacco industry group should complete supplementary questions in addition to the main questionnaire.

If you are in these sector groupings (according to the Global Industry Classification Standard (GICS)), the corresponding sector modules will not appear below but will automatically appear in the navigation bar when you save this page. If you want to query your classification, please email respond@cdp.net.

If you have not been presented with a sector module that you consider would be appropriate for your company to answer, please select the module below. If you wish to view the questions first, please see https://www.cdp.net/en-US/Programmes/Pages/More-questionnaires.aspx.

CC2.1b
Please describe how your risk and opportunity identification processes are applied at both company and asset level

Logitech has crisis management, business continuity, and disaster recovery plans and capabilities in place for critical functions occurring throughout the enterprise. We have designed these plans to ensure that operational needs can be met in the event of a significant business disruption. Our commitment to Business Continuity is reflected in our adoption of corporate standards in the areas of plan development, review, training, updating, and testing. Above all, we recognize that an effective Business Continuity program must evolve and improve through the employment of effective management systems. To identify risks, threats and vulnerabilities, Logitech conducts business impact analyses and threat assessments to establish planning priorities and business vulnerabilities. The BIA (Business impact analysis) and TA (Threat Assessment) are updated as required by changes in business operations, locations, and organizational structure.

CC2.1c
How do you prioritize the risks and opportunities identified?

Climate change risks include have been identified and include tornadoes, heavy rain, lightning, hurricanes, and blizzards. These weather events cause infrastructure failure, building damage, transportation closure, employee injuries and personal hardship, and other similar effects. Severe weather often relates to the exposure of the site to external hydrological conditions such as flood zones and tsunami inundation areas. Risk ranking criteria is as follows:
- High: Site located in flood zone or 100-year or 500-year floodplain, or a history of more than 1 catastrophic severe weather event per 10 year period
- Moderate: Site located adjacent to 100-year or 500-year floodplain, or a history of catastrophic severe weather event, but occurring less frequent than once per 10 year period
- Low: Site not located in designated flood zone, or no history of catastrophic severe weather events

CC2.2
Is climate change integrated into your business strategy?

Yes

CC2.2a
Please describe the process of how climate change is integrated into your business strategy and any outcomes of this process

The Logitech Sustainability team’s core function is to ensure that sound environmental, health and safety management practices have been integrated into all aspects of our business. Logitech aims to offer innovative products and services in a responsible and sustainable way. The Sustainability team is a corporate function. The Director of the Sustainability team reports directly to the SVP of Operations.

Manufacturing site targets have been established to reduce the levels of indirect GHG emissions during the manufacturing process.

Opportunities to reduce fuel, and resulting GHG emissions, through supply chain optimization have been identified and are pursued on an ongoing basis.

CC2.2c
Does your company use an internal price of carbon?

No, and we currently don't anticipate doing so in the next 2 years

CC2.3
Do you engage in activities that could either directly or indirectly influence public policy on climate change through any of the following? (tick all that apply)

CC2.4
Would your organization’s board of directors support an international agreement between governments on climate change, which seeks to limit global temperature rise to under two degree Celsius from pre-industrial levels in line with IPCC scenarios such as RCP2.6?

No opinion

CC2.4a
Please describe your board's position on what an effective agreement would mean for your organization and activities that you are undertaking to help deliver this agreement at the 2015 United Nations Climate Change Conference in Paris (COP 21)

**CC3.2**
Does the use of your goods and/or services directly enable GHG emissions to be avoided by a third party?

Yes

**CC3.2a**
Please provide details of how the use of your goods and/or services directly enable GHG emissions to be avoided by a third party

Logitech is acutely aware of the importance of integrating energy efficient design into our products. Logitech has a continuous improvement approach to product energy efficiency and it is a driving factor in our product development activities.

Logitech is subject to the EU’s Energy-related Products (ErP) Directive, which aims to encourage manufacturers and importers to produce products designed to minimize overall environmental impact. Under the directive, Logitech must ensure that our energy-related products comply with applicable requirements, issue a declaration of conformity and mark the product with the ‘CE’ mark. The directive does not have binding requirements for specific products, but does define conditions and criteria for setting, through subsequent implementing measures, requirements regarding environmentally relevant product characteristics. To date the following implementing measures within the ErP directive are active and applicable to Logitech products:

- 1275/2008: Eco-design requirements for standby and off mode electric power consumption of electrical and electronic household and office equipment.
- 278/2009: Eco-design requirements for no-load condition power consumption and average active efficiency of external power supplies.

Logitech has assessed the applicability of these implementing measures on relevant product lines and has taken steps to ensure that our products meet the requirements. Adoption of the ErP directive is in all EU member states and conformity has been demonstrated by Logitech in conjunction with current CE conformity marking requirements. Where possible, Logitech has applied these standards of energy efficiency beyond the EU to other global geographies where our product sell.

In the U.S we are subject to Appliance Efficiency Regulations adopted via the U.S. Energy Independence and Security Act of 2007. The regulations set out standards for the energy consumption performance of products within the scope of the regulations, which includes some of Logitech’s products. The standards apply to appliances sold or offered for sale throughout the U.S., and Logitech has redesigned or changed products to comply with these regulations.

In Australia and New Zealand, we are subject to the MEPS (Minimum Energy Performance Standards) regulations. These regulations set out standards for the energy consumption performance of products within the scope of the regulations, which includes some of Logitech’s products. We have taken steps to modify products to ensure they are in compliance with MEPS.

**CC3.3**
Did you have emissions reduction initiatives that were active within the reporting year (this can include those in the planning and/or implementation phases)

Yes

**CC3.3a**
Please identify the total number of projects at each stage of development, and for those in the implementation stages, the estimated CO2e savings

### Product efficiency regulations and standards

Current or expected government policy on climate change may have implications for product specific requirements such as EU ErP Directive and Energy Star which has the effect of impacting product design and could potentially lead to more limited sources for product components at a potentially higher cost to Logitech, its suppliers and customers. However, as such product regulations are likely to lead to more energy efficient designs then it is expected that any increase in cost would be offset by the reduced running costs of the revised product design.

From an operational risk management perspective, Logitech assesses risk to our operations based primarily on external hazards that could disrupt business functions. Generally, these threats take the form of natural disasters and human-caused disasters (some internal threats are evaluated as well such as hazardous substances, building fires, etc.). Risks and threats associated with climate change such as flooding, severe weather, wild fires (drought) are recognized, and appropriate response plans are developed in locations that are vulnerable to those events.

---

**CC6.1e**

Please explain why you do not consider your company to be exposed to inherent opportunities driven by physical climate parameters that have the potential to generate a substantive change in your business operations, revenue or expenditure

The unpredictable nature of climate change is viewed as having potential negative impacts from an operational cost, continuity of supply and supply chain costs and management point of view. Logitech do not produce products which protect against weather extremes nor enable customers to avoid heating or cooling costs directly.

---

Further Information
In 2013 we extended the boundaries of our reported facilities to include another significant leased building in China. The new values for Scope 1 and Scope 2 emissions for 2010 reflect the new reporting boundary. Please see Logitech Sustainability Report, Pg 4.

Attachments

CC8.1
Please select the boundary you are using for your Scope 1 and 2 greenhouse gas inventory

Operational control

CC8.2
Please provide your gross global Scope 1 emissions figures in metric tonnes CO2e

136

CC8.3
Please provide your gross global Scope 2 emissions figures in metric tonnes CO2e

14153

CC8.4
Are there are any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1 and Scope 2 emissions that are within your selected reporting boundary which are not included in your disclosure?

No

CC8.5
Please estimate the level of uncertainty of the total gross global Scope 1 and 2 emissions figures that you have supplied and specify the sources of uncertainty in your data gathering, handling and calculations

<table>
<thead>
<tr>
<th>Scope</th>
<th>Uncertainty range</th>
<th>Main sources of uncertainty</th>

**Scope 1**

| More than 2% but less than or equal to 5% | Metering/Measurement Constraints | Logitech report the purchased electricity and hot water consumed on site solely on our owned facilities therefore there is a high degree of certainty in our data. |

**Scope 2**

| More than 2% but less than or equal to 5% | Metering/Measurement Constraints | Logitech report the purchased electricity and hot water consumed on site solely on our owned facilities therefore there is a high degree of certainty in our data. |

**CC8.6**

Please indicate the verification/assurance status that applies to your reported Scope 1 emissions

No third party verification or assurance

**CC8.7**

Please indicate the verification/assurance status that applies to your reported Scope 2 emissions

No third party verification or assurance

**CC8.8**

Please identify if any data points have been verified as part of the third party verification work undertaken, other than the verification of emissions figures reported in CC8.6, CC8.7 and CC14.2

Additional data points verified | Comment
--- | ---
No additional data verified

**CC8.9**

Are carbon dioxide emissions from biologically sequestered carbon relevant to your organization?

No

**Further Information**

Logitech’s environmental and energy reporting boundaries are now inclusive of both owned and leased manufacturing facilities in China. All manufacturing under operational control. Please Page 4 of the Logitech Sustainability Report 2013.

**Attachments**

**CC9.1**

Do you have Scope 1 emissions sources in more than one country?

No

**CC9.2**

Please indicate which other Scope 1 emissions breakdowns you are able to provide (tick all that apply)

- By facility
- By GHG type

**CC9.2b**

Please break down your total gross global Scope 1 emissions by facility

<table>

<tbody>
<tr>
<td>0.00671</td>
<td>metric tonnes CO2e</td>
<td>unit total revenue</td>
<td>7</td>
<td>Decrease</td>
<td></td>
</tr>
</tbody>
</table>

Logitech’s environmental and energy reporting boundaries are now inclusive of both owned and leased manufacturing facility in China.

### CC12.3
Please describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tonnes CO2e per full time equivalent (FTE) employee

<table>
<thead>
<tr>
<th>Intensity figure</th>
<th>Metric numerator</th>
<th>Metric denominator</th>
<th>% change from previous year</th>
<th>Direction of change from previous year</th>
<th>Reason for change</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.93</td>
<td>metric tonnes CO2e</td>
<td>FTE employee</td>
<td>7</td>
<td>Decrease</td>
<td></td>
</tr>
</tbody>
</table>

Logitech’s environmental and energy reporting boundaries are now inclusive of both owned and leased manufacturing facility in China.

### CC12.4
Please provide an additional intensity (normalized) metric that is appropriate to your business operations

<table>
<thead>
<tr>
<th>Intensity figure</th>
<th>Metric numerator</th>
<th>Metric denominator</th>
<th>% change from previous year</th>
<th>Direction of change from previous year</th>
<th>Reason for change</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.8</td>
<td>metric tonnes CO2e</td>
<td>megawatt hour (MWh)</td>
<td>0.1</td>
<td>Decrease</td>
<td></td>
</tr>
</tbody>
</table>

Reduction in on-site fuel consumption resulting in reduction in Scope 1 emissions and overall reduction in CO2 emissions per MWh.

Further Information

Please refer to Page 10 - ENERGY REDUCTION PLAN

Attachments

**CC13.1**
Do you participate in any emissions trading schemes?

No, and we do not currently anticipate doing so in the next 2 years

**CC13.2**
Has your organization originated any project-based carbon credits or purchased any within the reporting period?

No

Further Information

**CC14.1**
Please account for your organization’s Scope 3 emissions, disclosing and explaining any exclusions
<table>

**CC14.2**
Please indicate the verification/assurance status that applies to your reported Scope 3 emissions

No third party verification or assurance

**CC14.3**
Are you able to compare your Scope 3 emissions for the reporting year with those for the previous year for any sources?

No, we don’t have any emissions data

**CC14.4**
Do you engage with any of the elements of your value chain on GHG emissions and climate change strategies? (Tick all that apply)

Yes, our suppliers

**CC14.4a**
Please give details of methods of engagement, your strategy for prioritizing engagements and measures of success

Logitech requests our top 10 suppliers (calculated based on procurement spend) to provide their facility energy and carbon data annually.

**CC14.4b**
To give a sense of scale of this engagement, please give the number of suppliers with whom you are engaging and the proportion of your total spend that they represent
Number of suppliers | % of total spend | Comment
---|---|---
10 | 31% | 

**CC14.4c**
If you have data on your suppliers’ GHG emissions and climate change strategies, please explain how you make use of that data

<table>
<thead>

</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Logitech products are beyond the scope selected in product type. We manufacture wired and wireless PC peripherals and personal devices.

ICT3.5

Please describe the efforts your organization has made to improve the energy efficiency of your products

Logitech has a continuous improvement approach to product energy efficiency and it is a driving factor in our product development activities. Please see our Sustainability Report Product section for further details.

All applicable products that utilize input power from the AC mains are manufactured and delivered with power management enabled.

ICT3.6

Please describe the GHG emissions abatement measures you have employed specifically in your ICT manufacturing operations

Reduced GHG emissions by 15% since 2010 in our manufacturing plant in Suzhou. Full details on energy reduction plan in Q CC3.3.

ICT3.7

Do you provide carbon emissions data to your clients regarding the hardware/component products they procure?

No

Further Information
