

Cordless Mouse

Easy scrolling with
cordless freedom

Logitech® Cordless Mouse moves you into the next level of easy navigation. Stop struggling with cords and experience comfortable cordless freedom in a rounded shape designed for right and left hands. The scroll wheel has you moving through your daily tasks faster and easier.

Cordless Technology Frees Your Space

No more cord to get tangled or caught. Just plug the cordless receiver into your system, within 6 feet of the mouse, and you can move about the desktop with complete freedom. The digital radio technology doesn't require line of sight. This mouse performs on crowded desks where cups, piles of papers and books come between it and the computer. The radio waves bounce around the objects. Plus, digital security IDs lock out interference and make the receiver listen to only one mouse, enabling the use of multiple mice in an office environment.

Scroll for Faster and Easier Navigation

The Logitech Cordless Mouse has a scroll wheel, which is also a third button, to help you navigate documents and the web with new speed. Use the scroll wheel and there's no need for scroll bars, or press the scroll button to activate WebWheel™ which lets you jump to your favorite web sites without closing the application you are using. Logitech MouseWare® software lets you assign your favorite shortcuts, like double click or Escape, to any button.

• Cordless
Freedom from tangled cords and clutter
• WebWheel™
Scroll and navigate faster than before
• For Right and Left Hands
Comfortable shape works with either hand

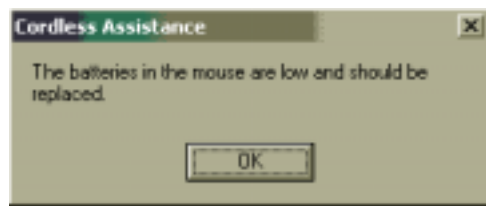

Cordless Mouse

Easy scrolling with cordless freedom

Cordless Power Keeps You Working

The Logitech Cordless Mouse uses two standard AAA batteries (included in the package) which last for 6 months. When your batteries start to run low, you'll receive a warning on your screen to change them if you've installed Logitech MouseWare which comes with your mouse. You can always check battery status by clicking on the mouse icon on the task bar.

Comfort and Control for Either Hand

The comfortable rounded shape provides easy control for right or left hands. Set either button to be your main click button.

Easy Connections

Just plug the compact receiver into the USB or PS/2 port on your computer. This receiver lets your mouse "talk" to the computer. Plug it in, hide it behind your computer, or set it off your desk, and forget about it. Install the Logitech MouseWare to take advantage of the shortcuts and battery detection software.

Quality You Can Rely On

This mouse is made with the uncompromising quality of Logitech, the leading maker of cordless and corded mice. The Logitech Cordless Mouse includes a three-year warranty, a guarantee you can trust from a company that has invented and sold over 10 million cordless mice.
